Proposal from KNDB for Global Draughts Development

Amended by the Executive Board (amount of 30.000 euro reduced to 20.000)

- *To for 2014-2015 reserve 20.000 euro from FMJD-funds for global draughts development*
- *To ask federations to participate with money, knowledge and manpower*
- *To make the continental championships and participation in these championships the foundation of the development plan*

Motivation

The distribution and popularization of draughts is a statutory responsibility of FMJD. Until recently, FMJD could not actively pursue this goal as the organization of world championships and title matches is a challenge in itself, presented to an organization that is made up entirely of volunteers. And until recently, even if FMJD would have had the volunteers, then still money would have been a big problem. However, during the last years, FMJD has been successful in generating revenue and now does have the possibility to reinvest money into global draughts.

Developments in The Netherlands have led to the availability of some money and manpower to support FMJD in this development goal. During the 2012-2013 World Championship Cycle, KNDB under its own responsibility but in cooperation with FMJD and the continental federations initiated and executed a project aimed at increasing the number of participating countries in the World Championship Cycle of 2013. This initiative has been a success: the number of participating countries in the 4 continental championships increased from the previous record 44 to 58 and the attendance at the World Championship 2013 in Ufa was extraordinary.

KNDB's initiative was triggered by new subsidy criteria for sports federations in The Netherlands where the number of participating countries in the World Championship Cycle is one of the determining criteria. KNDB from its 100 year jubilee fund had a leftover budget of 10.000 euro that it for this reason decided to spend on international development and a private sponsor – interested in developing draughts – doubled that budget. The win was for everyone: draughts was brought to new places, and new players and countries were supported to go and play in a continental championship. KNDB and other national federations for subsidy, sponsor or government recognition purpose can now quote the most recent number of countries participating in the World Title Cycle: 58!

This project proved, that with relatively limited means, much can be achieved. It also showed the potential of the continental championships as an efficient place for all to meet and work together towards the further development of draughts in each country.

It is clear, that the new World Championship Cycle 2014-2015 offers an opportunity to build upon the results and contacts of the World Championship Cycle 2012-2013. KNDB can no longer finance this project like it did for 2012-2013 as the jubilee fund has been exhausted and the sponsor contribution was a onetime donation. Instead, KNDB has made available a

smaller dedicated budget meant for the travel and expenses of a project coordinator. For the new FMJD-project, the coordinator will travel to each of the four continental

Proposal from Netherlands for world Records

Attempts to improve a World Records should be submitted by a national federation for approval by the FMJD in a period of three to six months before the attempt will take place. During the approval process the FMJD will not accept other proposals for the same World Record.

Only national federations can submit proposals for a World Record attempt to the FMJD. World Records may not be attacked earlier than six months after they are established.

Motivation:

The current practice is that players or organizers directly report an attempt to the FMJD, in some cases without informing the national federation. This is undesirable in the context of the promotion of Draughts. The national federation should be aware of what is happening inside the country. It brings greater clarity if world records are treated with the same procedure as used for the organization of other FMJD events.

A player or organization and sponsor invest much energy, time and money in an attempt and should not be trumped in the preparatory phase by another player or organization. If the attempt is successful they should have the right to enjoy it during six months after the event and have the opportunity to make promotion with this success.

Proposals from Poland about Youth tournaments and School championship

1. ONE common World Championship Youth(all categories) , like the European Youth Championship all groups together at the same venue and date.
 1. we suggest to do it at the same schedule every year:
 1. 1st Saturday in October - arriving day
 2. Closing ceremony - next Saturday
 3. Departure - Sunday morning
 2. Poland is ready to organise it on 2015:
 1. Saturday 3/10/2015 - arriving
 2. Sunday 4/10 - opening on blitz
 3.
 4. Saturday 10/10/2014 last 2 rounds and closing on the evening
 5. Sunday 11/10/2014 -
2. We like to propose - yearly event -> World Championship schools:
 1. 3 persons teams
 2. All players from the same school (amendment from Dutch federation)
 3. not limited number of teams from same country
 4. Age of participants -> 13 yo and younger.

Proposal from Ukraine about the World Title match

when a world title match cannot be played the World Champion keeps his title but does not have the right for a title match two years later. Then this right for a title match goes to the numbers 1 and 2 of the World Championship tournament.

D. Proposals of the Executive Board

Match fixing.

The proposal to accept the SportAccord text as valid for FMJD is accepted without a vote. See the separate document Code_on_Conduct_on_Sports_Betting_Integrity (English language) and FR_-_Code_de_Conduite_SportAccord_-_Paris_Sportifs_et_Integrite (in French language).

Section Turkish Draughts (Dama)

a section Turkish Draughts is created with at this moment only Turkey as a member.

Committee for discussing relation FMJD Section 64, IDF and FMJD

To inform all FMJD member federations about issues between the section 64 and FM JD member federations and about points brought forward in the General Assembly a committee is formed which has to report in 3 months.

Members of this committee: Mr Yacenko as first president of section 64, Langin, Pawlicki and if Russia wants a representative of the Russian Draughts Federation FSR.

First point: contradicting opinions between FMJD member federations and Mr Langin, president of FMJD section 64 Russian/Brazilian about obligatory membership of section 64-IDF for FMJD members.

Second point: the role the section 64 is playing in Brazilian Draughts. Are they really interested in organizing tournaments in Brazilian Draughts, do they organize these tournaments, or do they only claim to be interested.

Third point: the legality of IDF versus the FMJD section 64. Mr. Langin states that IDF is the legal entity for FMJD section 64. Several of our federations asked how this can be true as FMJD section 64 is part of FMJD and thus automatically FMJD is the legal entity for FMJD section 64.

e-vote about proposals not treated at this General Assembly

Due to the large amount of time taken by Belarus for repeating and repeating all their protests and the large amount of time for the discussion about the section 64 Russian/Brazilian the General Assembly did not have time to discuss and vote about the proposals of the FMJD Executive Board, the Tournament Director and the Technical committee and some proposals of the federations.

For these proposals an e-vote will be issued in the months following the General Assembly.
