## FMJD

## Annexes

The annexes written in English are juridical superior to other translations.
Each federation should make a copy available to its members, either systematically or on demand, in its own language and updated.

## Summary

Annex 1 Official FMJD rules for international draughts ..... 9

1. The game and the players ..... 9
2. The material ..... 9
3. The movement of the piece ..... 10
4. The capture ..... 11
5. Irregularities ..... 13
6. The draw ..... 14
7. The result ..... 14
8. Notation ..... 15
9. Conventional signs ..... 15
10. Time control ..... 16
11. Variations of the game ..... 16
Annex 2 Official regulations for the organization of official FMJD competitions ..... 17
12. List of official FMJD competitions ..... 17
13. Organizational procedures ..... 17
14. Technical rules ..... 20
Annex 3 Official FMJD competition regulations ..... 22
15. Competition and players ..... 22
16. Rights and duties of players ..... 22
17. The playing hall and the material ..... 24
18. Start of each game ..... 27
19. Towards the result of the game ..... 28
20. Notation and the use of the game clock ..... 32
21. Interruption ..... 37
22. Officials, press and public ..... 37
Annex 4 The referee ..... 39
23. The referee ..... 39
24. The role of the referee ..... 39
25. Appointment of the referee ..... 41
26. Promotion of referees ..... 41
27. Independence of the referee ..... 43
Annex 5 Swiss system ..... 44
28. Introduction ..... 44
29. Aspects of versions of the Swiss system ..... 44
30. Details of the aspects ..... 45
3.1. The final order of the players with the same score ..... 45
3.2. The order of the players to be used for the pairing in the first round. ..... 45
3.3. The order of the players to be used for the pairing in next rounds ..... 46
3.4. The system of pairing in a group of players with the same score. ..... 46
3.5. The method to use for an odd number of players in a group. ..... 46
3.6. The method by which players are paired who cannot be paired within their own score group. ..... 47
3.7. The importance of "colour preference": players having to play with white or black ..... 47
3.8. The importance of "floats": players with an opponent with a higher or a lower score. ..... 47
31. Some general details ..... 48
4.1. The method to use if the total number of players is odd. ..... 48
4.2. How to deal with a player leaving the tournament after having played a number of rounds. ..... 48
4.3. How to pair if one or more games are not (yet) played. ..... 48
4.4. The number of rounds in relation to the number of players. ..... 48
32. Some well-known standard systems ..... 49
5.1. FMJD Swiss on rating ..... 49
5.1a. FMJD Swiss system on rating, players committee preference ..... 49
5.2. standard FMJD Swiss (on Solkoff) ..... 49
5.2a. FMJD Swiss on truncated Solkoff. ..... 50
5.2b. FMJD Swiss on median Solkoff ..... 50
5.3. KNDB Swiss on Solkoff ..... 50
33. Acceleration methods ..... 51
6.1. Method with 4 groups ..... 51
6.2. Haley system ..... 51
Appendix A. Detail description of FMJD Swiss system on rating ..... 52
a. Start of the tournament: find all ratings ..... 52
b. Pairing for the first round ..... 52
c. Forming score groups for a next round ..... 53
d. Pairing in a score group ..... 53
e. The final result ..... 54
Appendix B. Detail description of FMJD Swiss system on Solkoff ..... 55
a. Start of the tournament: drawing of lots ..... 55
b. Pairing for the first round ..... 55
c. Forming score groups for a next round ..... 55
d. Pairing in a score group ..... 55
e. The final result ..... 57
Appendix D. Tournament performance rating ..... 58
Introduction ..... 58
Definition. ..... 58
Annex 6 Rapid and blitz games ..... 59
34. Definition. ..... 59
35. Other Annexes ..... 59
36. Tie breaking ..... 59
37. Recording Games and Use of Clocks ..... 59
38. The draw ..... 59
39. Rights of the players ..... 60

## Annex 1 <br> Official FMJD rules for international draughts

## 1. The game and the players

1.1 Draughts is a mind sport between two players.
1.2 The people engaging this sport are defined as the players.
1.3 Draughts can be played on an amateur as well on a professional basis.

## 2. The material

2.1. International draughts is played on a square board, divided into 100 equal squares, alternately black and white. This board is a draught board.
2.2. The game is played on the dark squares of the board. Thus, 50 squares are active.
2.3. The skewed lines formed by the dark squares are the diagonals. So, there are 17 diagonals. The longest diagonal, which joins two corners of the board and comprises 10 squares, is called the long diagonal.
2.4. The board must be placed between the two players in such a way that the long diagonal starts at the left-hand side of each player. This way, the first square at the left hand, for each player is a dark square.
2.5. Thus, positioned between the players, the board features the following items:
2.5.1. Bases: the side of the board facing each player, which are the promotion lines;
2.5.2. Sides: the squares at the side of the board, thus the first and/or the last column;
2.5.3. Rows: horizontal lines with 5 dark squares;
2.5.4 Columns: vertical lines with 5 dark squares.
2.6 The dark squares are as a convention, without actual writing numbers on the board, numbered from 1 to 50 . This numbering follows the rows, from left to right, starting at the first square of the upper row and ending at the last square of the lowest row, with the following results:
2.6.1. The numbers on the bases or promotion rows are numbered 1 through 5, and 46 through 50;
2.6.2. The 5 squares of the sides, or the first and the last columns, are numbered at the left 6-16-26-36-46 and at the right 5-15-25-35-45;
2.6.3. The squares at the end of the long diagonal are numbered 5 and 46 and are called the corners of the board.
2.7. International draughts is played with 20 white or light-coloured men, and 20 black or dark coloured men.
2.8. At the start of the game, the 20 black men are put on the squares with the numbers 1 to 20 and the 20 white men on those numbered 31 to 50 . The squares with the numbers 21 to 30 are empty, or free.

## 3. The movement of the piece

3.1. A piece can be either a man or a king.
3.2. A man and a king have different ways of moving and capturing. The movement of one piece, either a man or a king, is called a "move".
3.3. The first move of a game is always for the player with the white men. The players play one move, each one at his turn, with their own pieces.
3.4. A man has to move, forwards over a diagonal, towards an empty square of the next row.
3.5. A king is a man, which reaches and stops at one of the squares of the promotion line nearest to his adversary and is crowned with a man of the same colour.
3.6. When a player reaches the promotion line both players may crown the man which stops at the promotion line. However, if the opponent does not do this it is the obligation of the player to crown his man as part of his move. Not crowning a man promoted to King is considered an irregular move.
3.7. A man promoted to King stays a King even if it is not crowned. Both players have the right to crown the man at a later moment (opposed to article 5.4). Playing with a King which is not yet crowned is an irregular move.
3.8. A king can move only after the opponent has played.
3.9. A king moves forwards and backwards over the successive free squares of the diagonal he occupies; thus, he can come to rest, passing over free squares, on a distant free square.
3.10. The move of a piece is finished when the player has released the piece after moving it.
3.11. Whenever a player, who has the move, touches one of his playable pieces, he has to play with that piece, provided a legal move is possible.
3.12. As long as a piece during a move has not been released, the player can put it on another free square, if that is possible.
3.13. The player who has the move, and wishes to place his men more neatly on the squares, has to announce beforehand and clearly to his opponent, stating "I adjust" (or " $j$ 'adoube")
3.14. It is considered incorrect, when a player who does not have the move, touches or adjusts one or more of his men or of his opponent.

## 4. The capture

4.1. Capturing a piece of the opponent can be done both forwards and backwards. A capture counts as one complete move. One cannot capture one's own pieces.
4.2. Whenever a man meets, diagonally, a piece of the opponent behind which is a free square, he is obliged to jump over the opponent's piece and occupy that free square. That particular piece of the opponent is taken from the board. This total operation is the capture by a man.
4.3. When a king encounters, on the same diagonal, either close or in the distance, a piece of the opponent behind which one or more squares are empty, he is obliged to jump over it and occupy a free square by choice. This total operation is the capture by a king.
4.4. A capture has to be clearly indicated and executed in this order. Absence of a clear indication is incorrect, and rectification can be requested by the opponent. The capture is considered finished when all the opponent's captured pieces have been lifted from the board.

It is obligatory to make the move and take the captured pieces from the board with one and the same hand. Using two hands for making the move and taking the captured pieces is incorrect, and rectification can be requested by the opponent.
4.5. When in the course of a capture, a man meets, diagonally, another piece of the opponent behind which is an empty square, he is obliged to jump that second piece too, even a third piece and so on, and occupy the empty square behind the last piece taken. The captured pieces are then lifted from the board, in the ascending or descending order of the capture. This total operation is a multiple capture by a man.
4.6. Whenever a king, during a capture, meets, either on the same diagonal or on one of the perpendicular diagonals, a piece of the opponent behind which are one or more empty squares, he is obliged to pass over that second piece, if needed turning a corner towards the piece that can be taken, even a third, and so on, and finally occupy one square by
choice behind the last piece captured on the same diagonal. The captured pieces of the opponent are then lifted from the board, in the ascending or descending order of the capture. This total operation is a multiple capture by a king.
4.7. In the course of a multiple capture, it is forbidden to jump over one's own pieces.
4.8. In the course of a multiple capture, it is permitted to pass over the same empty square more than once, but it is forbidden to pass over the same piece of the opponent more than once.
4.9. A multiple capture has to be indicated clearly, putting the capturing piece down on the empty square after each jump and putting that piece on the final square. Absence of a clear indication is incorrect, and rectification can be requested by the opponent.
4.10. The move of a piece during a multiple capture is considered finished when the player has released his capturing piece after or during the course of the move.
4.11. The opponent's pieces can only be lifted from the board after the completion of the multiple capture. The pieces are taken from the board after the move itself, and in the ascending or descending order of the capture, without stops in between. Taking the pieces in another order or without order is considered incorrect and rectification can be requested by the opponent.
4.12. The taking of the pieces from the board is considered finished, when the player has taken all captured pieces or when he has clearly stopped during this operation.
4.13. The capture of the largest number of pieces has priority and is obligatory. In the application of this rule, the king has no priority or obligation. A king, like a man, counts as one piece.
4.14. If a choice exists between captures of equal numbers of pieces, a player is free to choose any of these possibilities, be it with a man or with a king.
4.15. Confirming article 3.5., a man who passes during a multiple capture, over a square of his opponent's promotion row, but ends on another row, remains a man at the end of the capture.
4.16 If a man captures with a man one man of the opponent, he may also do this in the following order: first removing the man of the opponent and then executing the jump.

## 5. Irregularities

5.1. If during a game, the board is noted to be wrongly positioned regarding article 2.4., the game is annulled, and has to restart.
5.2. Compliance with article 2.8 has to be checked before the start of the game. For each irregularity noted during the game, article 5.4. below holds.
5.3. Each piece on a white square is inactive. It can be put into action only with the permission of the opponent.
5.4. If a player has committed one of the following irregularities, his opponent has the right to decide whether that irregularity must be rectified, or on the contrary, must be allowed to stand.
5.4.1. Playing two moves consecutively;
5.4.2. Moving a man or a king in an irregular way;
5.4.3. Touching one of one's pieces and then moving another one;
5.4.4 Taking back a move played;
5.4.5. Moving a piece of the opponent;
5.4.6. Playing a piece when a capture is possible;
5.4.7. Taking without reason one of the pieces from the board, either of the opponent or one's own;
5.4.8. Capture by a piece, of less or more than the number of possible pieces to capture;
5.4.9. $\quad$ Stopping during a multiple capture (released piece, see article 4.10);
5.4.10. Irregularly lifting a piece, during an unfinished multiple capture.
5.4.11. Taking, after a multiple capture, less pieces from the board, than captured;
5.4.12. Taking, after a capture, pieces that have not been jumped.
5.4.13. Stopping, during a multiple capture, in taking the pieces;
5.4.14. Taking, after a capture, one or more of one's own pieces.
5.4.15. Promoting a man to King without crowning him.
5.4.16. Playing with a King which is not yet crowned.
5.4.17. Using two hands for making the move and taking the captured pieces.
5.5. If by accident the position on the board is changed, this fact is not considered an irregularity provided it is noted at the same time.
5.6. If a player refuses to comply with the Official Game Rules, his opponent has the right to force his compliance.
5.7. If a player makes a move after his opponent has committed an irregularity or has refused to comply with the Official Game Rules, that move indicates an acceptance of the situation. Then a rectification can no longer be obtained.
5.8. A partial rectification of an irregularity or a refusal cannot be tolerated.

## 6. The draw

6.1. A game is considered a draw when the same position occurs for the third time, with the same player having to move.
6.2. If during 25 successive moves for each player, only the kings have moved, without any man moving or without any capture, the game is considered drawn.
6.3. If only three kings remain, two kings plus a man, one king and two men, against one king, both players may play another 16 moves maximum. When during these 16 moves a piece is taken the maximum of 16 moves remains valid. If the player with a king solely occupies the large diagonal for both players may play another 5 moves maximum. After the maximum amount of moves the game shall be considered a draw with exception for the following situation: with the last move of these moves the position on the board is changed into a position which is lost for the opponent according to article 7.2.2 or 7.2.3 : he cannot move because all his pieces are blocked or because he has no more pieces; in that case this will take precedence and the game will be declared lost for the opponent.
6.4. The end game with two kings, one king and a man, or one king against one king will be considered a draw when the players have each played another five moves maximum. After these 5 moves the game shall be considered a draw with exception for the following situation: with the last move of these 5 moves the position on the board is changed into a position which is lost for the opponent according to article 7.2.2 or 7.2.3 : he cannot move because all his pieces are blocked or because he has no more pieces; in that case this will take precedence and the game will be declared lost for the opponent.

## 7. The result

7.1. There are two possible results at the end of a game:
7.1.1. A win for one of the opponents, and, by consequence, a loss for the other;
7.1.2. A draw when neither of the players has been able to win.
7.2. A player wins when his opponent:
7.2.1. resigns with or without reason;
7.2.2. has the move but cannot move a piece, as all are blocked;
7.2.3. has no pieces left;
7.2.4 $\quad$ refuses to comply with the rules.
7.3. A draw is obtained when neither player can win or:
7.3.1 both players agree to a draw by mutual consent;
7.3.2. the rules for draws in article 6 apply;

## 8. Notation

8.1. The active squares are numbered 1 to 50 , according to article 2.6 ., so it is possible to note the moves of the pieces, move by move, both for the white and the black pieces, and thus replay or transcribe a whole game.
8.2. The transcription of the moves has to follow the following convention:
8.2.1. The number of the starting square, followed by the arrival square;
8.2.2. The two numbers may be separated by a hyphen (-) in the case of a simple move;
8.2.3. The two numbers may be separated by a cross (x) in case of a capture.

## 9. Conventional signs

9.1. For clarity's sake, the conventional signs used are the following:
9.1.1. to indicate a move: - ;
9.1.2. to indicate a capture: x ;
9.1.3. to qualify a strong move: ! ;
9.1.4. to qualify a very strong move: !! ;
9.1.5. to qualify a weak move: ? ;
9.1.6. to qualify a very weak move: ?? ;
9.1.7. to indicate a move that seems to be weak but in fact turns out to be strong: ?! ;
9.1.8. to indicate a move that seems to be strong but in fact turns out to be weak: !? ;
9.1.9. a forced move, with any other move resulting in a loss: *;
9.1.10. to indicate a win: + ;
9.1.11. $\quad$ to indicate a draw: $=$;
9.1.12. to indicate, after the last move played during a game, the number of men won: $+1,+2$ etc.
9.1.13. to indicate, in the same fashion, the number of men lost: -1, -2 etc. ;
9.1.14. the sign a.l. (ad libitum) indicates choice in a capture with the same result.

## 10. Time control

10.1. It may be arranged, for a game, that each player has to play a certain number of moves in a given time.
10.2. In that case it is obligatory for all players:
10.2.1. to use a playing clock
10.2.2. to transcribe the whole game move by move.
10.3. It may be arranged, for a game, that each player has a certain time till the end of the game.
10.4. In that case, it is obligatory to use a playing clock, without the obligation to record the moves.
10.5. The description and the rules of use for the clock are treated in the Rules for Competitions.

## 11. Variations of the game

11.1. There may be variations in the way to play a draughts game:
11.1.1. normal games on a board, between two face-to-face opponents;
11.1.2. normal games on a board, between a player who faces simultaneously a certain number of players;
11.1.3. games played by correspondence between two players who send, alternately, the moves played;
11.1.4. games between a player who does not look at a board, and also does not record the game, and a player who does have a board;
11.1.5. games between a player who does not look at a board, and also does not record the game, and simultaneously a certain number of players who do have a board;
11.1.6. games played with a blind player (or between blind players) who have a board with pieces in relief at their disposal;
11.1.7. normal games on a board, between two players of unequal force, with the strongest one starting with a handicap of one or more pieces less.
11.2. For these variations, with the exception of what is cited under article 11.1.1., specific rules and regulations are given
11.3. For the variations cited in article 11.1.3 through 11.1.5 the board is supposed to be placed between the two players.

## Annex 2 <br> Official regulations for the organization of official FMJD competitions

## 1. List of official FMJD competitions

1.1. Individual competitions on the 100 squares
1.1.1. World Championships as well as world championships for women, juniors (boys and girls), cadets (boys and girls), mini cadets (boys and girls), hopes (boys and girls), veterans $60+$, clubs and disabled.
1.1.2. World title match, and world title match women
1.1.3. Continental championships
1.2. Team competitions 100 squares
1.2.1. World team championship
1.2.2. World cup for continental teams
1.2.3. Olympiads
1.2.4. Continental team championships
1.3. Individual competitions 64 squares.

For 64 the same competitions as for 100 are official FMJD competitions, as given in article 1.1 and 1.2.

## 2. Organizational procedures

2.1. All official competitions are played under the auspices of the FMJD.

For the World Championship and the World Championship Women the following planning schedule holds:

- The qualification rules must be ready at the General Assembly 2 years before the tournament.
- The qualification tournaments have to be finished 6 months before the World Championship
- Publication of the participant list: 6 months before the tournament
- Publication of the regulations for the tournament: 3 months before the tournament
- Publication of the reserve list: 5 months before the tournament

Changes in the regulations of the World Championship and World Championship women can only be done by the General Assembly
2.1a. Organization place, sponsor place and make even place.

For each official FMJD tournament, the organizing federation has the right for an extra place called the organization place and an extra place called the sponsor place. The organization place will be assigned by the federation. The sponsor place will be assigned by the sponsor of the event in cooperation with the federation and the organization committee with the restriction that it must be a player who can play at the level of the competition. Preferably the sponsor should minimally pay the prize money for the tournament, but at least $50 \%$ of the prize money to have this right.
2.2. The organizing national federations should not be in debt to the FMJD.
2.3. The official tournament calendars, with the allotment to the organizing federations, are established by the General Assembly of the FMJD, till the next General Assembly. Official tournaments for which there is not yet candidate for the General Assembly may be allotted by the FMJD Council.
2.4. The organizing federation has to confirm its agreement, in case of allotment, at least one year before the competition concerned, and transfer in the three months after the General Assembly the Guarantee Fund.
2.5. The national federations have to comply with the rules and regulations of draughts and of the FMJD for the organization of official competitions allotted to them. If a federation organizes an official title tournament, or an authorized FMJD tournament, it has to use the official rules of the FMJD as well as its rules for the competition.
2.5a. Continental championships

- A continental confederation is more or less independent. They have the right to organize a continental championship as they like it.
- Only if the continental championship is organized following the rules and regulations of the FMJD there is a right for automatic titles and for title norms.
- A qualification tournament for the World Championship has to be organized following the rules and regulations of the FMJD.
2.6. The fact that a national federation delegates a player to an official competition implies complete and unequivocal acceptance of the details of the FMJD rules, and of the Specific Rules of the competition.
2.7. The federations who delegate one or more players to official competitions have to comply with the rules set by the Executive Council of the FMJD.
2.8. Lodging costs. Referee costs. Medical costs

The national federation that organizes an official competition pays for the following items:
a. Meals and lodging of the participants at the championships of minors, girls and boys (juniors, cadets, mini-cadets, hopes)
b. Meals and lodging of the main referee and his assistants as well as travel costs (round trip) to the competition venue for the assistant referees
c. Also, the organizers of the relevant federation make an effort cover all risks on accidents, illness and hospitalization for the members of the Organizing Committee, the arbiters and the participants of the competition, during the whole competition.
2.9. Travel costs

Travel costs of the participants to the venue of the competition, round trip, all costs of coaches and representatives are not for the organizing federation to cover.
2.10. The national federation, which has taken the responsibility for an official international competition, must arrange to raise the national flags and perform the national anthems of those players who have won the competition.
2.11. Appeal Jury

For World Championships the council of FMJD installs an appeal jury of at least three members, at least one from the Council of the FMJD.

For continental championships it is a task of the continental confederation to install an Appeal Jury.
This jury has to answer, respecting fully the rules, any appeal (written in French or English, with a copy for the Main Referee) by a player against a sanction or decision of the Main Referee. The protest must be accompanied with the sum of $50 €$ as a deposit from the signatory. The deposit must be handed to the Chairman of the appeals committee. If the appeal is granted, the sum shall be returned immediately. If the appeal is refused, the deposit is forfeited to the FMJD.

The decision of the Appeal Jury is final.
2.12. Protocol of opening ceremony

Each organizing federation should respect the following protocol, during the opening ceremony:
a. Opening speech
b. Presentation of players, who have to be apart from the audience, one by one in an individual competition, or by team, with a short mention of the highest titles.
c. At the call of their names, the players line up, and the player called takes a step forward and greets the public, the officials and the organizers;
2.13. Protocol of closing ceremony
a. The players are again lined up and separated from the audience;
b. The announcement of the tournament results by the main referee;
c. Handing over of the prizes on a podium (three places)
d. Performance of the national anthem of the winner and raising of flags.
2.14. Prizes

For each individual competition, the FMJD gives three medals (gold, silver, bronze) to the first three, as well as a diploma.
In team competitions, the number of golds, silver and bronze medals will be proportional to the number of players in the three best teams. Also, a diploma shall be handed to the winning federation. Finally, a diploma as a sign of gratitude shall be given to the organizing federation.
2.15. Reporting the tournament

It is obligatory to use the official FMJD software Draughts Arbiter Pro for reporting the tournament

## 3. Technical rules

For each competition the following items have to be treated in its Specific Rules (SR):

- The FMJD establishes the type of competition (round robin tournament, Swiss tournament), the list of participants in the case of world titles, or the continental confederation in the case of continental competitions
- The organizer states the place, date, the venue and eventually the prizes (in gifts or in money)
This SR has to be drawn up according to the general Regulations in the Annexes 1-18 of the FMJD.

Any change at the last minute that renders the implementation of this SR impossible, will be dealt with by the Main Referee, after consulting for advice the organizer.

For these competitions, the following rules are binding;
a. Minimum number of rounds: 7
b. In a round robin tournament players of the same federation have to encounter each other in the first half of the tournament.
c. For team competitions, the composition of each team, unchangeable and signed by the captain, has to be handed in a sealed envelope to the Main referee, and all the players have to have the nationality of the country.
d. In the case of a tie for the first place, a deciding match is needed for a world or continental title, of which the details (number of games and/or rapid games) have to be cited in the SR. In an official FMJD tournament where all criteria for tie breaking mentioned in Annex 3 article 5.11 are equal for the first place or for places with rights for qualification a tie break has to be played which may include normal, rapid and/or blitz games but which ends with the Superblitz tie break. See Annex 3 article 5.10.
e. In case of a match (world title or for a lower place) the organizer has to state whether he will stop the match when a decision has been reached.
f. The age limits for youth:

- Juniors: maximum age at December 31 of the year of the competition is 19 years
- Cadets: maximum age at December 31 of the year of the competition is 16 years
- Mini Cadets: maximum age at December 31 of the year of the competition is 13 years
- Hopes: maximum age at December 31 of the year of the competition is 10 years
- Young stars: maximum age at December 31 of the year of the competition is 8 years

The SR must be in attendance at the playing hall during the whole competition.

## Annex 3 <br> Official FMJD competition regulations

## 1. Competition and players

1.1. A competition is a sportive event. In the course of the competition, the players strive for one or more prizes.
1.2. The players, on a one to one basis, the one with the white men, the other with the black men, play individually according to their own talent and skill. The games are played according to a predetermined schedule, at an indicated venue, at a given time, in accordance with the Game Regulations.
1.3. A competition between two players is called a match. A competition between more players is called a championship or tournament according to whether or not the title of champion is at stake.
1.4. The organization of a competition is delegated to a committee of competent persons; the direction of a competition is delegated to a referee, who can be seconded (see Annex IV).

## 2. Rights and duties of players.

2.1. The proper outcome of a competition is made possible by granting the players certain rights, but also demanding of them certain duties. The players are expected to be conversant with the rules and regulations of the competitions in which they participate, including, if applicable, of the Special Regulations. These regulations consist of:

- General regulations, and if applicable the special rules (Annex 12-18), which are Internal Regulations of the FMJD
- The specific regulations for each competition, which must be brought to the players' knowledge at a convenient time, either personally or through their national federations.
2.2. Rights of players: the players have the right to:
2.2.1. be informed about the regulations of the competition;
2.2.2. be able to play the competition in all tranquillity.
2.2.3. address the referee personally regarding any question relevant to their game;
2.2.4. address the organizing committee, either personally or through an intermediary
2.2.5. appeal - non suspensive - to the Appeal Jury or the main referee, in writing, in French or English, with a copy to the Main Referee, against a sanction or a decision of a referee. If there is an appeal Jury their decision is final. If there is no appeal jury in the
tournament the appeal should be directed to the main referee who will decide, if necessary, after consultation with the organisers of the tournament and/or with external specialists. His decision is final.
2.2.6. walk around in the playing area.
2.3. Duties of the players: the players have the duty to:
2.3.1 strictly respect the regulations
2.3.2. answer questions of the referee and follow his directions;
2.3.3. ignore the counsels and advice of other people;
2.3.4. play till the end of the competition.
2.4. Prohibitions: the players are, during the competition, forbidden to:
2.4.1. address anyone, with the exception of the referee and the service personnel;
2.4.2. use another draught board or written or printed material that may be relevant to their game, with the exception of numbered diagrams to help keeping a record of their game;
2.4.3. leave their board when it is their move.
2.4.4. touch the squares of the board or point to them, in order to help their concentration;
2.4.5. disturb their opponent when he is thinking;
2.4.6. disturb a game in progress;
2.4.7. take an advice about their game;
2.4.8. analyse a game in progress;
2.4.9. analyse a finished game in the playing area;
2.4.10. behave in any way which may upset the smooth running of the competition;
2.4.11. walk beyond the playing area with the exception of going to the toilet or get something to drink;
2.4.12. stay too long at the side of a game in progress.
2.4.13. (Electronic doping) carry with them and / or use any kind of electronic devices (like mobile phones, handheld computers, pocket computers, wireless communication devices, etc.), unless it is evident for the referee that these devices could not be of any benefit for the game (like simple watches).
2.5. Sanctions.
a. with a verbal comment which may also be given by an assistant referee The following sanctions should only be given by the main referee, according to his judgment on the seriousness of the infringement:
b. with a written official warning which is also publicized
c. with a time, penalty and/or some extra time for the opponent who may be disturbed by a player's behaviour
d. with loss of the game (if necessary, for both players)
e. with disqualification from the competition
2.5a. Procedure for irregular moves

In case a player makes an irregular or illegal move his opponent has the following possibilities:

- accept the irregularity and go on with the game
- not accept the irregularity but immediately push his clock and demand correction from the opponent
- the preferred action of his opponent is to call the referee for assistance. Because the referee cannot be at his board immediately the players have the right to stop both clocks.

When the referee is at the board, he will ask both players what happened and then decide what should be done.

Apart from the normal actions of the referee like making an observation or giving a warning the referee may also decide to give a time penalty for the player who made the irregular move and may decide to add time for his opponent.
The time penalty should at least be equal to the time per move from the time schedule of the game if the game is played with a Fischer time schedule.
2.6. Exclusions

All refusals to respect the regulations, or to obey a referee, qualify for a decision for exclusion by the referee.

## 3. The playing hall and the material.

3.1. A playing hall has to comply with the following conditions:
3.1.1. there must be sufficient room, air and light;

The light intensity on the playing table should be 500 (minimum) to 700 lux
3.1.2. there must be a normal temperature;

The temperature in the playing room should be between 20 and 23 degrees Celsius.
Depending on the level of the competition the referee may be more flexible or less flexible with the conditions for light and temperature.
3.1.3 there must be silence;
3.1.4. the playing area must be fenced in and apart from the area reserved for the public.
3.1.5. the tables must be stable, and there must be enough tables to enable each game to be played at a separate table. The tables must be numbered;
3.1.6. each playing table must conform to the following minimum dimensions: width between 75 cm and 90 cm , and the length at least 100 cm . The height of the table is 75 to 85 cm . For youth events other parameters may be varied as applicable to the age of the athletes by agreement with TDY.
3.1.7. The chairs must match the tables in height, and there must be enough chairs to enable every player to have their own chair.
3.1.8. Each referee must have a table and a chair at his disposal;
3.1.9. Snack bars and toilets must not be too far from the playing area; the players must not be obliged to mingle with the public for these services.
3.2. The playing board

The playing board must conform to the following demands:
3.2.1. It must have a playing surface of between $35 \times 35 \mathrm{~cm}$ and $45 \times 45 \mathrm{~cm}$.
3.2.2. The surface must not be overly shiny.
3.2.3. The difference between the light and dark squares must be clear; the colours must not be too white and must contrast with the colours of the men.
3.3. (reserved)
3.4. The playing men

The playing men must satisfy the following conditions:
3.4.1. The 40 men must be identical in form and dimension;
3.4.2 $\quad$ Their diameter must be between 7 mm to 14 mm less than the side of a square; otherwise, on an international draughts board of $45 \times 45 \mathrm{~cm}$, men can be used of a diameter between 38 and 31 mm .
3.4.3. The thickness of the men must be between $1 / 4$ and $1 / 5$ of its diameter;
3.4.4 The 20 white men and the 20 black men must be, respectively, of the same colour;
3.4.5. Their colours should contrast with the colours of the board and not be overly shiny.
3.5. Availability of the materials

On each table a board must be set out, with men ready for the start of a game. Two additional boards and sets of men must be at the disposal of the Main Referee.
3.6. The clock and time control

In order to limit and control the time for thought and making the moves, a special control clock with double action and double face is used.
3.7. A control clock must meet the following criteria:
3.7.1 both clocks must work properly;
3.7.2. it must be possible to stop both clocks at the same time;
3.7.3. it must not be possible for both clocks to run at the same time;
3.7.4 the stopping of one clock must immediately start the other clock;
3.7.5. the passing of the minute hand over 12 must be indicated by a flag or an arrow; in case of an electronic clock, the passage of the allotted time for a player must be indicated on his screen in a clear and permanent fashion. In case of time overrunning, the electronic clock has to indicate unequivocally which player has overrun his time in the first instance.
3.7.6. The flag must begin to rise after the 58th minute and fall precisely at the 60th minute. These indications should be very precise and visible. In case of an electronic clock, the screen has to indicate precisely the minutes and seconds left before the next time control, at least two minutes before that control.
3.7.7. Each of the clock face must have a diameter of at least 80 mm . In the case of an electronic clock, each screen must measure at least 15 mm by 45 mm .
3.7.8. Clocks must be stable and easy to handle.
3.8. Getting the clock ready.

A clock has to be placed on each playing table, parallel to the left side of the board when viewed from the white side, and equidistant from the bases. This position may be modified at the discretion of the referee.

Two reserve clocks, in working order, must be permanently at the disposal of the referee.
3.8.1. The minute hands of each clock must be put at the 12 with the flag high and close to falling. Each screen must indicate 0 hours minus some seconds. In case of an electronic clock each screen will indicate 0 hours or the time remaining till the first-time control. At each time control, the screen will indicate 0 hours or the time remaining till the following time control.
3.9. Notation forms

In order to keep a record of each game, a notation form is made available for each player.
3.10. These notation forms must meet the following criteria:
3.10.1 make double notation possible
3.10.2 be placed on a support at the side of each board, for each player;
3.11. Placement of the players:

The order of encounters between players in round robin tournaments is determined by the tournament table in which the players have drawn their lots. In Swiss tournaments this order depends on the provisional ranking of the players.
3.12. Before the start of each game, the playing materials must be in perfect condition and meet the required standards.
3.13. It is forbidden to use the material designated for the competition for other purposes than for the official games.

## 4. Start of each game

4.1. Preparation period

Each player must be allowed a time of 15 minutes to prepare himself for the game. It is advisable to have silence in the playing hall during this time, lest the players are distracted. Those who wish to prepare beforehand, should be able to do so. The preparation period does not apply to blitz and rapid games.
4.2. Photographs, television

During the preparation period and for a maximum of 10 minutes into the official game time, flash photography is permitted.

An official television company may receive permission to operate, under the following conditions:

- The equipment should be placed in such a way to generate a minimum amount of disturbance for the players;
- No player should be in a critical phase of a game;
- The filming should be as short as possible.
4.3. The referee must assign each player his place. No change of place is permitted without approval by the referee
4.4. Start of the game

At the indicated hour, whether the players are present or not, the referee must give the sign to start the games by starting the clocks of those players having the white pieces. From that moment on, both players are not allowed to stop both clocks, except in the case of an irregular move (see article 2.5 a), with loss of the game as a sanction, nor can they put the game clock at the other side of the board or change the position of the hands of the clock.

If a player arrives late by no fault of his own, the referee may restore the hands of his clock to the starting position.
4.5. Start of the game when both players are late.

When two players of one board are both absent, the referee starts the clock of the player with the white pieces. If one of the two players arrives, the referee divides the time passed equally between the two clocks, and then restarts the white clock.
4.6. Error in colours.

If after both players have made a move it is discovered that the players have played with the wrong colours the game must continue. The result of the game stands.

## 5. Towards the result of the game.

## 5.1. (reserved)

5.2. coming too late for a game

A player may not come at his board too late. If he comes at his board too late his game will be declared lost for him. The special regulations of a tournament will define what is too late.

These regulations may specify a delay time from 0 minutes to 60 minutes.
If the time is not specified, then this is 60 minutes.
The Special Regulations of a tournament will mention the consequences for a player coming too late at his draughts board if the delay time is less than 60 minutes. These may be:

1. An official warning
2. A fine for the player coming too late
3. Direct loss of the game
4. Other penalties to be decided by the direction of the tournament.

If the delay time is 60 minutes a player who comes too late directly loses the game.
5.3. Proposal for a draw

Before a proposal for a draw can be made, at least 40 moves must have been made by each player. A player wishing to propose a draw has to do so in his own clock time, by performing the following three operations immediately one after the other:
a. Make his move
b. Propose a draw, without giving a comment;
c. Put his opponent's clock in motion.

The proposal remains valid as long as the opponent has not answered; making a move implies a negative answer. After having received a negative answer, the same player should not repeat his proposal before his opponent has made a similar proposal.

### 5.4. Equal end game

In order to establish a regulatory draw in an end game, the referee has to be called.
The referee may also decide about a regulatory draw on his own initiative without any claim of the player. When he remarks that there is a regulatory draw situation it is his duty to end the game.
5.5. Protests

All protests about anomalies, incorrect actions or irregularities have to be addressed to the referee.
5.6. Game points

In a standard competition points are allotted to each game result:
5.6.1. $\quad 2$ points are allotted for a win
5.6.2. 1 point is allotted for a draw;
5.6.3. $\quad 0$ points are allotted for a loss.
5.6a. A competition may also use alternative counting systems with other results for win and draw and/or with results for each round depending on the combined results of a normal game and/or rapid and blitz games.

Some examples: the plus-remise and the Beijing counting system.
In the plus remise system a plus remise is awarded to the player who cannot win the game but has a lasting advantage of at least 3 men at the end of the game (where a King counts for 2 men ). The result is written as $1+-1-$

In the Beijing counting system each round consists of a normal game, a rapid game, a blitz game and an Superblitz tiebreak.

A player who wins the normal game gets a result of 12-0. If the normal game is a draw a rapid game is played. A player who wins the rapid game gets a result of 9-3. If the rapid game ends in a draw a blitz game is played.

The winner of the blitz game gets a result 8-4. If the blitz game ends in a draw an Superblitz tiebreak is played (see article 5.10). The winner of this tiebreak gets a result 75.

Other counting methods are also accepted.
However, for rating calculations the results of the game(s) in a round will be counted using the standard game points of article 5.6.

If the tournament regulations do not mention any alternative counting system, then the standard counting system of article 5.6 has to be used.
5.7. Forfeiting result

When a player is absent, or when he cannot play the scheduled game for whatever reason, his scheduled opponent receives the number of forfeit points belonging to winning the game.
The same holds for a player who is more than ONE hour late at his board.
5.8. Forfeiting result for two players

When two players are absent or unable to play the game scheduled between the two of them for whatever reason, the result of that game will be zero - zero.
5.9. Withdrawing from the competition

When a player withdraws from the competition, for whatever reason, he proceeds as follows:
A. In a round robin tournament:
a. If he has not played more than half of the scheduled games, his results on the final table are cancelled and he will not be classified;
b. If he has played more than half of the games, his results will remain on the final table and he will be classified. The non-played games will be considered forfeit losses and indicated as with an F (for Forfeit) or R (for Regulatory) behind the result on the final tournament table.
B. In a Swiss tournament:

The results of a player who has withdrawn will stand and he will be classified according to the games he played.
5.10. Final classification and tie breaking

At the end of the competition, a classification is drawn up by adding up the points each of the players have obtained. The first place is given to the player who has the largest number of points, the other places are given in descending order.
The special regulations of the tournament have to mention what will happen if players end with the same score. This may be done by making use of the tie breaking decisions of article 5.11 and / or using tie breaking games to come to a decision.

Tie breaking games may be normal games, rapid or blitz games, depending on the type of competition.

A special form of a tie breaking game is the "sudden death" Superblitz tie break: both players get a limited time for an unlimited number of games plus some seconds extra for
each move with the use of the electronic clock and the Fischer system. Also, the delay system may be used (see article 6.1)

Such a Superblitz tie breaking game is played until one of the players wins a game or until the time of one of the players is expired as marked by the falling of the flag or the special signal on the electronic clock. When a game is ended in a draw a next game starts with the remaining time on the clock for both players.
5.10a. Final classification and tie breaking using alternative counting methods

When alternative counting methods are used (see article 5.6a) the tournament regulations have to mention if and how the tie breaking rules will be different from the standard rules in the article 5.11.
5.11. Tie breaking decisions
5.11.1. Individual competitions
5.11.1.1. Tie breaking: in normal games or rapid games (see Annex 6) according to the rules laid down in the particular regulations of that competition.
5.11.1.2. If no special regulations have been decided the following criteria must be applied in the following order:

### 5.11.1.2.1. For round robin tournaments:

1. the largest number of victories
2. the result between the tied players
3. the best result obtained in the order of the classification.
5.11.1.2.2a. For Swiss System tournaments on Solkoff:
4. Short Solkoff Truncated
5. Solkoff plus
6. Solkoff Baliakin
7. Full Solkoff Truncated
5.11.1.2.2b. For Swiss System tournaments on rating:

The highest average rating of the opponents
All these systems are presented in detail in Annex 5 point 3.1.
Other options are also possible if defined in the Specific Rules (SR) of the competition.
5.11.2. Team competitions
5.11.2.1. Tie breaking: as above for the individual competitions
5.11.2.2. If no previous agreement has been made, the following criteria must be applied in the following order:
5.11.2.2.1. For round robin tournaments:

1. The largest number of individual points
2. The largest number of points at the first board, if needed at the second etc.
5.11.2.2.2. For Swiss system tournaments:
as above for individual competitions in Swiss system (article 5.11.1.2.2.)
When all tie breaking criteria of article 5.11 are equal or when no decision can be made on the basis of the tie break rules the places are shared, unless the tournament regulations specify otherwise.

## 6. Notation and the use of the game clock

### 6.1. Rate of play

Time schedules may be fixed time schedules or time schedules with extra time for each move.

Fixed time schedules are time schedules with a fixed time for the whole game or with a fixed time for a number of moves, like 2 hours for 50 moves plus 1 hour for every subsequent 25 moves.

Time schedules with extra time per move are usually Fischer time schedules but also delay systems (also called Bronstein time schedule) may be used.

With the Fischer system a player gets some extra time for each move. In the delay system the player also gets extra time for each move, but he cannot build up time by playing quickly, like he can do with the Fischer time schedule.

Time schedules with extra time are generally Fischer time schedules but in the tournament regulations also time schedules with delay time may be used.

Some standard time schedules for international competitions:
a.) default system for official FMJD competitions: Fischer system with 1 hour and 20 minutes (or more, but maximum 2 hours) +30 seconds for each move.
b.) Players Committee preference: 90 min for the first 45 moves, followed by 30 min for the rest of the game with an addition of 30 seconds starting from $46^{\text {th }}$ move.
c.) Old standard system: 2 hours for the first 50 moves followed by 1 hour for each subsequent 25 moves. If the first 50 moves have been made in less than 2 hours, the time not used must be credited to the player and added to his time for the next moves.
d.) 5 hours round: 2 hours / 50 moves +30 minutes till the end

Other time schedules are also acceptable with preference for time schedules with extra time per move with the Fischer system. Any combination of basis time and Fischer time is allowed under the following conditions:

The minimum added time per move with the Fischer system is 30 seconds for normal games. This may be less for semi-rapid, rapid and blitz games.

The total time for both players for a normal game should be minimum 2 hours for the first 60 moves.

The Annexes 9 and 10 about rating and titles will exactly define which total time for the first 60 moves of the game will be acceptable for the games to count for rating and for titles.

In playing time schedules ending with a fixed time to end the whole game it is preferred to give a minor addition of extra seconds Fischer system per move from the moment that the flag falls after this fixed time.

If the tournament is played with a fixed time schedule and if electronic clocks are available, it will be obligatory to use a system with extra Fischer seconds. Only when there are no electronic clocks available will it be allowed to play with a fixed time schedule without Fischer seconds at the end of the game.
6.1.1. Special regulations for games with fixed time schedule without Fischer seconds

In the case of a fixed time schedule without Fischer seconds at the end of the game the
following special regulations are valid:
6.1.1.a: Regulation-draw

If only three kings remain, two king plus a man, or one king and two men, against one king, or only two kings, one king and a man, or one king against one king the game shall be considered a draw unless the game has an obvious continuation and the player can demonstrate the win. This end game will not be played and is called a regulation draw.
6.1.1.b: Time Shortage

Any player who has one minute or less left on his clock, in the endgame phase with a maximum of 8 pieces total for white and black, has the right to claim a draw if his position is clearly superior.

### 6.2. Obligation to record

Each player must keep a record of all the moves in every game. (except for those cases dealt with in articles 6.12 to 6.14 below.) The recording may be done by an assistant, but only if there is good reason, at the discretion of the referee.
6.3. The record

The record of the moves must conform to Article 8.2. of Annex I. The record must be kept up to date as each move is made and must be clearly legible. Of course, the record of exchange capture can be kept after the completion of the captures.
6.4. The recording forms, for the referee.

The referee must be able to see the recording forms and know how many moves have been made at all times. The recording forms have to be on the playing table continually, well in view for the referee.
6.5. Verification of the recording

If a player wishes to verify his record of a game by comparing it with that of his opponent, he must do it in his own playing time, provided his opponent agrees.
6.6. Starting the clock at the beginning of the game.

As soon as the referee, at the proper time, starts the clock for the player with the white pieces, (article 4.4. supra), the latter plays his first move and waits till his flag falls (if it has not fallen already) before he presses the button to stop his clock and start his opponent's clock. The player with the black pieces then plays his first move and also waits for his flag to fall (if it has not already fallen) and before stopping his clock and starting white's clock. In case of an electronic clock, as soon as the referee has started the clock in action at the side of the player with the white pieces, the latter can stop his clock and start his opponent's clock as soon as he has played his first move.
6.7. Starting the opponent's clock

When a player has made his move, it is up to him to stop his own clock, and as a consequence, start his opponent's clock, with the same hand with which he has made his move. With regards to counting the moves in case the flag has fallen the move is only considered finished at the moment the player stops his clock. For all other purposes the completion of the move is defined in annex 1 article 3.10 and article 4.4.
A player always has the right to stop the clock directly after his move. His opponent may not prevent the player to stop the clock.
6.8. Forgetting to operate the clock

As each player is responsible for his own use of time, nobody can intervene when a player forgets to stop his clock and start his opponent's clock; only the latter may draw his attention to it. Yet, the referee may ask the players who is to move.
6.9. Malfunctioning clocks

If during the course of a game, a clock appears to be not working properly, the referee must replace it with a sound clock. If the clock emits sounds, it is considered an abnormality.
6.10. Functioning of the flag

Any protest or comment on the functioning of the flag must be made before the time control; Once the flag has fallen no appeal can be accepted.

In case of an electronic clock, any protest and comment on the functioning of the control signal must be made before the time control. Once the time control has passed no appeal can be accepted.
6.11. Exceeding the allotted time

The expiry of playing time is marked by the falling of the flag. (Or the time signal in the case of an electronic clock). With regards to counting the moves in case the flag has fallen the last move made is only considered completed when the player has stopped his clock. Any player whose time has expired before completion of the required number of moves, has lost the game.

When the referee remarks that the flag has fallen before completion of the required number of moves it is his duty to end the game, even in the absence of any claim of a player.
6.12. Time trouble

A player is said to be in 'time trouble' when he has 5 minutes or less to go before his flag falls, or in the case of an electronic clock before the time signal will occur. This is valid for the time control during the game after a number of moves given in the rate of play, or at the final time control at the end of a game with a time schedule ending with a fixed time to end the whole game.

However, if the game is played with the Fischer system with 30 seconds or more for each move, the player is said never to be in time trouble.
6.13. Recording during time trouble.

Any player in time trouble is not obliged to continue recording the game. However, once his flag has fallen, or in the case of an electronic clock the time signal has occurred, he must record the moves made during his time trouble, if possible, with the help of the referee. This must be done during his own playing time. If this takes more than 5 minutes, the referee may postpone this till after the game, after the formalities described in article 6.29 , infra.
6.14. Time trouble for both players.

If both players are in time trouble, then both must bring their records up to date after the fall of both flags. The time taken to do this must be shared equally between the two players. If the moves cannot be recalled, then the record must be abandoned. If this takes more than 5 minutes, the referee may postpone this till after the game, after the formalities described in article 6.29, infra.
6.15. Verifying the number of moves made

Each of the players must be able to prove that the necessary number of moves has been made in the allotted time. The time needed for this verification, is eventually attributed to the player who is amiss If both players are unable to prove they have made the necessary number of moves, after the 5 minutes used for this try per player, the game must be continued from the position where it was interrupted for the verification and the recording should start at the 51 st move, or of the 76th move etc.. The recording must start again at this point. If the referee is sure to know the number of moves played, he proceeds with the measures described in the articles $6.13,6.14$ supra, whichever is the case.
6.16. Time used by the referee to verify the number of moves

If, by reason of the playing conditions, the verification by the referee of the number of moves played, has to be done in another spot, the time for the transport will not be counted.
6.17. Time used for an appeal to the referee

Any player appealing to the referee for a draw must leave his clock running whilst his appeal is being considered. If his flag falls before the referee makes his decision, then in the case of a draw being awarded the fallen flag must be overlooked, otherwise the game is lost.
6.18 Time used for the rectification of an irregularity

The time needed for the rectification of an irregularity by the referee is measured by the referee and counted as the time spent by the player who is amiss, whatever the consequence.
6.19 A player who has lost, must stop his clock immediately.
6.20. Completing the recording forms immediately after the end of the game.

Directly after the game each of the two players must record the time used and the result of the game on his recording form. The record of moves must be brought up to date if possible. The originals of the two notation forms, correctly signed by each, eventually corrected or rewritten, if needed, will be handed to the referee.

## 7. Interruption

7.1. Games must not normally be interrupted.
7.2. Exceptional instances of interruption

If the conditions of the playing venue are not satisfactory for any reason it may be necessary to interrupt the competition. The competition must be resumed as soon as the problems have been dealt with. The maximum time for an interruption is 1 hour.
7.3. Minimal availability of the playing venue

The playing venue must be available without interruption for each round of the competition.
7.4. (deleted)
7.5. (deleted)
7.6. (deleted)
7.7. (deleted)
7.8. (deleted)

## 8. Officials, press and public

8.1. Office of the organisation committee

The office of the organisation committee, where officials meet, must be separate from the playing area.
8.2. Press room

The space reserved for sports journalists must be separate from the playing area.
8.3. Playing area and public area.

In connection with Annex 3.1.4. above, it is important to remember that:

- The playing area is where the action is.
- The area reserved for the spectators is a quiet area.
- Spectators can only enter the playing area with the permission of the referee.
- A player who has ended his game has the same rights as a spectator.
8.4. The press

The organisers must give complete and up to date information to the press who share the same rights and obligations as any other member of the public
8.5. Special permits

People authorized to enter the playing area, must wear a special badge, and must conduct themselves in accordance with the regulations. They have the same rights and obligations as the players
8.6. Access to the playing area during time trouble.

During the period when the players might be in time trouble the number of people admitted to the playing area must to be reduced to a strict minimum. Only the Main Referee has the authority to admit or prohibit the presence of specific people in the playing area.
8.7. Behaviour of the public

In the public area, everyone must behave themselves in a reasonable way. In particular members of the public must:

- Not give advice or make comments to the players
- Not engage conversation with the players
- Not disturb ongoing games, or interfere in any way with the games
- Not analyse ongoing games by using draughts boards however small;
- Keep a complete silence
- Not make gestures or give signs to the players, or make low voiced or whispered comments;
- Help make sure that the competition proceeds under the best possible conditions.
8.8. Commentaries on games

Ongoing games can be shown on a large demonstration board, in a special room, on condition that no analysis about what might happen in the game is made. Commentaries about what has already happened are allowed.

## Annex 4 <br> The referee

## 1. The referee

1.1. The referee may operate alone, or with assistants. In the latter case, the referee is called the Main Referee and his assistants are called Assistant Referees.
1.2. The function of the referee (either alone or as main referee) is to run the competition.
1.3. The function of assistant referees is to assist the Main Referee. They are responsible to him.
1.4. The duty of the referee is to ensure that everyone conforms to the rules and regulations. This includes spectators as well as players.
1.5. The role of the referee is not limited to the competition itself, but also before and after the competition, and not only during the games, but also before and after the games.
1.6. The referee has the right to intervene in any dispute, even in the absence of voiced complaints. However, this right to intervene does not imply the authority to decide on the two cases implied in article 5.4 of Annex I and in article 6.8 of Annex III.

## 2. The role of the referee

The role of the referee is implementation of the rules and regulations as laid down in the annexes of the FMJD. The list below is for purposes of precise implementation.

The referee must:
2.1. Be in possession, through the organizer, of the Specific Regulations for the competition in good time before the opening of the competition.
2.2. Delete any part of these Specific Regulations that changes or contradicts the general FMJD rules and regulations.
2.3. Have the official list of players, title holders and reserves, signed by the organizer, at the latest half an hour before the opening ceremony of the tournament or the drawing of lots.
2.4. Have at his disposal a board for posting his official communications.
2.5. Ensure that the Specific Regulations are permanently on display.
2.6. Ensure that the final list of prizes is displayed at the latest on the day when the last round of the first half of the competition is played.
2.7. Make sure that this list is clear and correct.
2.8. Wear a visible sign of his function. (e.g. a badge.)
2.9. Always have an assistant at hand who is authorized to take decisions.
2.10. Direct the placing of the players in the next round.
2.11. Start the clocks or give the order to do so.
2.12. Be the only one who may stop a clock or may give the order to do so. Exception in case of an irregular move, Annex 3, article 2.5a
2.12a. Decide what to do when a player calls for his assistance in case of an irregular move.
2.13. Periodically supervise the correct functioning of the clocks during the games.
2.14. Check that players are recording the games.
2.15. Take it upon himself to record the moves played, when players are in time shortage and may have ceased recording.
2.16. Exert himself to settle any conflict between players.
2.17. The referee decides in the following cases:
2.17.1. Indicate the loss of a game for any player who fails the make the necessary number of moves in the allotted time.
2.17.2. Decide on the draw result of a game when he concludes that the game is drawn according to the regulations of the game, Annex 1, articles 6.1 to 6.4. This may be after a claim of a player or at the initiative of the referee. When the referee remarks that there is a regulatory draw situation it is his duty to end the game.
2.18. Decide on the loss of the game for any player who arrives at his board more than one hour late.
2.19. Interpret any sentence in the regulations the interpretation of which is contested.
2.20. Decide on any issue not covered by the regulations.
2.21. Collect the top copies of the recording forms.
2.22. Ensure that the table of results is kept up to date.
2.23. Assume responsibility for the pairings, either by computer or by hand.
2.24. Supervise the announcement of the pairings.
2.25. Direct the adjournment procedures.
2.26. Be the one who presents the final results of the competition in the final ceremony, after consultation with the organizer.
2.27. Draw up a report on the organization and results of the competition.
2.28. Describe, if needed on a separate piece of paper, the anomalies, incidents, claims for extra penalties, and draw up proposals to improve the situation in the future.
2.29. Keep himself informed on the follow-up of these claims and proposals.

## 3. Appointment of the referee

For all official FMJD competitions and record attempts:
3.1. The Main Referee is appointed by the FMJD Executive Council, in consultation if possible, with the organizing federation. If proposed by the latter, he must hold the title of International Referee.
3.2. The FMJD Executive Council can delegate this right to the one of its Tournament Directors.
3.3. Each Assistant Referee is appointed by the organizing federation unless the FMJD Tournament Director decides otherwise.
3.4. The FMJD considers it advisable that referees operate out of their own country and encourages national federations to establish contacts with other federations for this purpose.

## 4. Promotion of referees

4.1. Referee titles

There are three kinds of referees recognized by the FMJD.
4.1.1. Technical FMJD-referee

A referee who may act as assistant in a FMJD-tournament without the right to take decisions.
4.1.2. FMJD referee

A referee who may be main referee at an international tournament or assistant referee at an official FMJD tournament.
4.1.3. International referee

A referee who can lead an official FMJD tournament.
4.2. For promotion to the rank of referee the following conditions have to be met by the candidate:
4.2.1. Technical FMJD referee - a thorough knowledge of the FMJD regulations.
4.2.2. FMJD referee
4.2.2.1. A thorough knowledge of the FMJD regulations.
4.2.2.2. Fluency in at least one official FMJD language.
4.2.2.3. Proved active as national referee and as assistant or main referee in an international tournament.
4.2.3. International referee
4.2.3.1. A thorough knowledge of the FMJD regulations.
4.2.3.2. Being able to speak at least two official FMJD languages.
4.2.3.3. Proved active minimum 3 times as an FMJD referee in international tournaments with positive reports of the main referee with the International Referee title.
4.3. The promotion procedure is as follows:
4.3.1. A proposal for promotion is addressed to the Technical Committee of the FMJD, or to the Executive Council of the FMJD.

The proposal can be done by:
4.3.1.1 the national federation of the candidate,
4.3.1.2. A confederation,
4.3.1.3. The Technical Committee of the FMJD

Remark: When a confederation or the Technical Committee propose a new nomination, then the opinion of the national federation should also be asked.
4.3.2. Scrutiny of the proposal by the technical committee of the FMJD.
4.3.3. Report of that committee to the Executive Council of the FMJD.
4.3.4 Decision by the Executive Council.
4.3.5. Ratification by the General Assembly of the FMJD.
4.3.6. Presentation of a diploma to the candidate.
4.3.7. The 'International referee' will receive a referee badge from the FMJD. Each International referee must be provided with an up to date copy of the Internal Regulations of the FMJD with annexes by his national federation, and if necessary, translated by the latter. The international referees are ranked according to seniority, experience, performance etc.

## 5. Independence of the referee

5.1. The referee must be completely impartial at all times.

The functions of organizer and referee are complementary.
5.2. The main referee must consult with the organizing committee if he has to object any measure that goes against the general regulations. He must not be a formal member of that committee.
5.3. The authority of the referee is guaranteed by the FMJD, who will penalize any attitude that may diminish the authority of the referee.
5.4. The referee must command respect, if necessary by applying penalties as laid down in the rules.
5.5. The costs of the referee must be paid. He should be paid according to the terms laid down by the FMJD. (The availability and use of information technology by the referee has to be implemented under conditions to be discussed between him and the organizer).

## Annex 5 <br> Swiss system

## 1. Introduction

The Swiss system is a tournament system to use when the number of players is so large that it is not possible to play a round robin system. The essence of the system is that in each round as much as possible players are paired who have the same or almost the same score.
A player cannot play more than one time against the same opponent.
There are many versions of the Swiss system, depending on the way in which the final result is defined for players with the same score and depending on the way in which the pairing for all rounds is defined.

Apart from the essence of the system all details may be chosen freely by a tournament organization. For official FMJD tournaments the preferred systems are FMJD Swiss system on rating and FMJD Swiss system on truncated Solkoff, unless the FMJD Tournament Director decides otherwise.
In the tournament regulations the number of rounds and the version of the Swiss system to be used should be mentioned including any special details used.
If the number of participants is much less or much more than expected when the regulations were written the main referee, after consultation with the organization, has the right to change the number of rounds if it leads to a considerable improvement of the relation between number of players and the number of rounds

## 2. Aspects of versions of the Swiss system

The versions of the Swiss system may differ in a number of aspects relating to the final order of the players and the pairing:

1. The final order of the players with the same score.
2. The order of the players to be used for the pairing in the first round.
3. The order of the players to be used for the pairing in next rounds.
4. The system of pairing in a group of players with the same score.
5. The method to use for an odd number of players in a group.
6. The method by which players who cannot be paired within their own score group are paired with a next group.
7. The importance of "colour preference": players having to play with white or black.
8. The importance of "floats": players with an opponent with a higher or a lower score.

## 3. Details of the aspects

### 3.1. The final order of the players with the same score.

There are several systems in use to order players with the same score:
a. Solkoff or Buchholz: the sum of scores of all opponents
b. Solkoff median: the sum of scores of all opponents minus the highest score minus the lowest score
c. Short Truncated Solkoff: The sum of scores of all opponents minus the lowest score
d. Full Truncated Solkoff: The sum of scores of all opponents minus the lowest score; if this is equal the sum of all opponents minus the 2 lowest scores .... Etc.
e. Solkoff plus: the sum of the opponents Solkoff
f. Solkoff Baliakin: the sum of the opponents scores multiplied by their Solkoff
g. Sonnenborn Berger: the sum of 2 times the scores of the players against who the game was won plus the sum of scores of the players against who the game was drawn.
h. Average opponent rating: the average rating of all opponents
i. Tournament performance rating of the player, see appendix D.

It is even possible to let the tournament performance rating be the first decisive factor for the final result and not the total score!!
j. Own rating of the player
k. Number from drawing of lots

In some systems some of these methods are combined, as examples:

- $\quad$ Solkoff median and if equal Solkoff truncated
- Solkoff truncated and if equal Solkoff plus
- $\quad$ Solkoff truncated and if equal Solkoff Baliakin
- Short Solkoff truncated and if equal Solkoff plus and if equal Solkoff Baliakin and if Equal Full Solkoff truncated (new FMJD standard since 2019)
- Solkoff and if equal Sonnenborn Berger.

### 3.2. The order of the players to be used for the pairing in the first round.

To be able to pair the players in the first round the following methods are used to make an order:
a. Drawing of lots
b. Own rating

### 3.3. The order of the players to be used for the pairing in next rounds.

To be able to make a pairing between players with the same score in the next rounds the following ordering methods are used:
a. Solkoff followed by Sonnenborn-Berger
b. Own rating
c. Numbers from drawing of lots
d. Average opponents rating

### 3.4. The system of pairing in a group of players with the same score.

In a group of players with the same score and an even number of players the following pairing methods are used:
a. Pairing two half groups: the players of the first half of the group are paired against the players of the second half of the group. As an example: if there are 6 players, ordered as 1,2,3,4,5,6 the pairing is: 1-4, 2-5 and 3-6.
b. Pairing highest player against lowest. As an example, with 6 players: 1-6, 2-5, 3-4
c. Pairing by drawing of lots

To be able to minimize the differences in average rating within a score group the FIDE has defined the Dubov Swiss pairing method which is a combination of 3 b and 3 c with 2 b : The player with the highest average opponents rating plays against the player with the lowest own rating.

### 3.5. The method to use for an odd number of players in a group.

To reach a group with an even number of players one player is moved to the next group. This may be
a. the first player of the group.
b. the last player of the group.
c. a player chosen at random from the group.

There may be conditions such as: if there is no good pairing possible in the remaining group then another player may be moved to the next group. It is important that within one score-group the maximum possible number of pairings is made.

### 3.6. The method by which players are paired who cannot be paired within their own score group.

a. A player from a higher group plays against the first player of the next group
b. A player from a higher group plays against the lowest player of the next group

If the pairing in the higher group was not complete and if more players are moved down to the next group this same principle is used for the players moved down, starting at the highest to move down.

As an example: suppose 3 players $\mathrm{A}, \mathrm{B}$ and C are moved down from the higher group with the order $\mathrm{A}, \mathrm{B}, \mathrm{C}$ in that higher group and suppose the players in the lower group are ordered $1,2,3,4,5,6$ then:

- With method a we will have the pairing A-1, B-2, C-3
- With method $b$ we will have the pairing A-6, B-5, C-4

### 3.7. The importance of "colour preference": players having to play with white or black.

It is permitted to let the colour preference of players influence the pairing, instead of just the colour allocation after the pairing has been made, provided that the maximum number of games to be paired within a score group is not influenced. The following methods are used:
a. No colour preference: the pairing is made following the pairing rules and when the pairing is made the colour is attributed to the players in such a way that as much as possible an even division of colours is reached.
b. Weak colour preference: if a player has played 2 times more with one colour and he should play again with this colour then the pairing in a group may be changed to give the player the other colour.
c. Strong colour preference: after each round (especially after each odd round) the players in a score group are separated in two subgroups: players who should play with white and players who should play with black and the first pairing criterion will be that the players from one subgroup play against the players of the other subgroup.

### 3.8. The importance of "floats": players with an opponent with a higher or a lower score.

Now and then it is necessary that a player is paired against a player with a higher score (a so called "up-float") or a lower score ( a so called "down-float"). The pairing in a score group may be changed if the pairing would lead to a situation where the player, who
played against an opponent with a higher score in one or both of the previous 2 , has to play anew to a player with a higher score (or a player who played to an opponent with a lower score in one or both of the previous 2 rounds has to play anew against a player with a lower score).

## 4. Some general details

### 4.1. The method to use if the total number of players is odd.

In case the total number of players in the tournament is odd an extra dummy player is added to the tournament.

The last player of the lowest Group is paired with this dummy player and gets a "bye" (pause) and receives two points. A player cannot get more than one "bye" in a tournament. To avoid a bad pairing in the second round the player who has a bye in the first round is paired in the second round as if he had zero points.

If the rating plays a role in the tournament the dummy has the lowest rating in the tournament minus 1 .

### 4.2. How to deal with a player leaving the tournament after having played a number of rounds.

A player who leaves the tournament after having played a number of rounds keeps his position in the classification. The player is not paired anymore in the remaining rounds of the tournament. When the number of players was even a dummy player is added to the tournament and treated as described in point 9 . If there was already a dummy player in the tournament this dummy player is not paired anymore in the remaining rounds.

### 4.3. How to pair if one or more games are not (yet) played.

When one or more games are not yet played and it is necessary to make the pairing for the next round the game(s) not played are considered to be a draw, only for pairing purposes. Two paired players, who did not play their game, may be paired together in a future round.

### 4.4. The number of rounds in relation to the number of players.

There are many theories about what the number of rounds should be.
It depends on the total number of players.
It may depend on the number of players who get rights from the tournaments.

All what is said in this regulation is that the number of rounds should not be too large in relation with the number of players. If the number of rounds comes too close to $50 \%$ of the number of players, then there may appear problems in the pairings for the last rounds.

## 5. Some well-known standard systems.

### 5.1. FMJD Swiss on rating

- The final order between players with the same score is decided by 3.1 h : the average rating of the opponents.
- The order in the pairing group for the first round is 3.2 b : own rating.
- The order in the pairing group for the next rounds is 3.3b: own rating.
- The pairing system is 3.4 a : pairing in two half groups.
- In case of a group with an odd number of players 3.5 b is used: the player with the lowest own rating is moved to the next group
- This moved player plays according to 3.6a: to the highest rating in the next group
- The FMJD Swiss on rating is preferably played with using "floats", see point 3.8.
- $\quad$ The FMJD Swiss on rating is preferably played without colour preference (see p.3.7). If the referee or the organization decides that it is necessary to play with colour preference it should be written in the tournament regulations.

## 5.1a. FMJD Swiss system on rating, players committee preference

This version is a variant of the FMJD Swiss on rating with the following differences:

- In a pairing group the player with the highest average opponents rating is paired against the player with the lowest own rating.
- In case of a group with an odd number of players the player with the highest own rating goes to the next group and plays against the player with the highest own rating in that group.

## 5.2. standard FMJD Swiss (on Solkoff)

- The final order between players with the same score is decided by 3.1c followed by 3.1e, followed by 3.1f, followed by 3.1d: Short Solkoff truncated and if equal Solkoff Plus and if equal Solkoff Baliakin and if equal Full Solkoff truncated
- The order in the pairing group for the first round is 3.2a: number from drawing of lots.
- The order in the pairing group for the next rounds is 3.3a: Solkoff plus SB.
- The pairing system is 3.4 a : pairing in two half groups.
- In case of a group with an odd number of players 3.5 b is used: the lowest player (lowest Solkoff and SB) is moved to the next group
- This moved player plays according to 3.6a: to the highest player in the next group (highest Solkoff and SB)
- If the pairing is made with a computer program which does not support this option it is also allowed to let the first player of the higher group play against the last player of the lower group, as in the KNDB Swiss system on Solkoff.

## 5.2a. FMJD Swiss on truncated Solkoff

- The final order between players with the same score is decided by 3.1d: Full truncated Solkoff.
- All other rules are the same as for standard FMJD Swiss

## 5.2b. FMJD Swiss on median Solkoff

- $\quad$ The final order between players with the same score is decided by 3.1 b followed by
3.1d: Solkoff median followed by Full truncated Solkoff.
- All other rules are the same as for standard FMJD Swiss

### 5.3. KNDB Swiss on Solkoff

- The final order between players with the same score is decided by 3.1a followed by 3.1g: Solkoff followed by Sonnenborn-Berger.
- The order in the pairing group for the first round is 3.2a: number from drawing of lots.
- $\quad$ The pairing in the first round is 1-2, 3-4, etc. or random (not important)
- The order in the pairing group for the next rounds is 3.3 a : Solkoff followed by Sonnenborn-Berger.
- The pairing system is 3.4 b : highest against the lowest.
- In case of a group with an odd number of players 3.5a is used: the highest player (highest Solkoff and Sonnenborn-Berger) is moved to the next group
- This moved player plays according to 3.6 b: to the lowest player in the next group (lowest Solkoff and Sonnenborn-Berger)

## 6. Acceleration methods

There are several acceleration methods in which in the first rounds the rating differences in the games for the first round(s) will not be too large.

### 6.1. Method with 4 groups

For the first round the players are divided in 4 groups in the order of the players ratings. Then the players of the first group play against the players of the second group and the players of the third group play against the players in the fourth group, in the order of their ratings.

For the next rounds, as long as the first group is larger than the number of rounds to be played, the same method is used with the division of the players with equal score in 4 groups and pairing the first group against the second and the third group against the fourth group.

Of course, when playing a Swiss system tournament with many players and large differences in rating, it is also possible to create more groups and let players from group 1 play against group 2 , group 3 against group 4 , group 5 against group 6 etc.

### 6.2. Haley system

For the first round the players are divided in four groups and paired as in method 1.
In the second round the players of the first two groups get two extra points, only for pairing purposes, and then the players with 4 points are paired with each other, then the players with 3 points, then the players with 2 points etc.
Players who are paired with 3 or 4 points are players from the first two groups and players with 1 or 0 points are players from the third and fourth group whereas only in the group of 2 points there are players from all groups: players from the first two groups who have lost their first game or players from the last 2 groups who have won their first game.

## Appendix A. Detail description of FMJD Swiss system on rating

## a. Start of the tournament: find all ratings

Before the start of the tournament the ratings of all players are collected. Depending on the kind of tournament these may be FMJD ratings or national ratings.

For players who do not have a rating a rating estimate has to be made by the referee and/or the organization. If possible, the FMJD formulae should be used to calculate FMJD ratings from national ratings. For a number of countries FMJD has published calculations on its website to calculate from national rating to FMJD rating or vice versa.
Only if it is not possible to find an estimate based on any rating of the player the referee should make an estimate as good as possible.
It is possible to ask the player himself if he can give an estimate or to ask other players if they can estimate how strong the player is.

## b. Pairing for the first round

For the pairing of the first round all players are ordered on their own rating.
The group of players is divided in two halves: the group A of players with the highest rating and the group $B$ of players with the lowest rating. Both groups ordered on the own rating of the players.

Then the pairing for the first round is made in which the strongest player of group A plays against the strongest player of group B , the second strongest player of group A against the second strongest of group B .... Etc.

To avoid difficulties in colour for next rounds player A1 plays with white against player B1, player A2 player with black against player B2, player A3 plays with white etc.
Schematically:
A1-B1
B2 - A2
A3-B3
B4 - A4
etc.

## c. Forming score groups for a next round

After each round the players are grouped into score groups of players with the same score. As much as possible players in the same score group will be paired against each other.
The players in each score group are ordered on their own rating.

## d. Pairing in a score group

If there is an odd number of players in a score group, then depending on the version of the FMJD Swiss on rating there are the following rules:

- For the standard FMJD Swiss on rating the player with the lowest own rating is paired with the next lower score group and plays against the player with the highest own rating in that group.
- For the players preference version of the FMJD Swiss on rating the player with the highest own rating is paired with the next lower score group and plays against the player with the highest own rating in that group.
However, if the tournament is played with using "floats" this pairing may be changed: if the player in the higher score group already had a "down float" in one or both of the previous 2 rounds then the next higher player in the score group is selected to play against a player of a next score group.

This holds also for the player from the lower score group: if he already has had an "upfloat" in one or both of the previous 2 rounds the next lower player from the lower score group is selected to play against the player of the higher score group.
If no good pairing is possible between the subgroup $A$ and $B$ it is acceptable to move down another player to have a better pairing between subgroup A and subgroup B.

For the pairing in the group all remaining players with the same score are ordered on their own rating.
The group of players is divided into two halves: the group A of players with the highest rating and the group $B$ of players with the lowest rating. Both groups are ordered on the own rating of the players.

Then the pairing for the round is made in which the strongest player of group A plays against the strongest player of group B, the second strongest player of group A against the second strongest of group B .... Etc, just like the pairing for the first round. After the pairing is made the colours are given to the players in such a way that an even distribution of colours to all players is reached as much as possible.

When the tournament is played with weak colour preference then the pairing may be adjusted when it leads to a pairing where it is impossible to give a correct colour to both players. For instance, if both players played two times more with white it is not possible to give them both a correct colour. In principle the pairing is made until a problem of colours is reached. Then the player of the higher group is paired against a next player from the lower group against who it is possible to attribute colours to both players.
If necessary, the whole pairing may be changed to get good colour attributions.
However, when it is not possible to give all games in a score group a good colour attribution then it is not allowed to move 2 or more players to another score group.

When the tournament is played with strong colour preference then in odd rounds the colour preference is the first criterion in the pairing process: the group of players with the same score is divided in a group W of players who should play with white and a group B of players who should play with black.

In principle the players of group W play with white against the players of group B.
As much as possible the pairing principle of the Swiss system on rating should be obeyed: the group of players with the highest rating play against the group of players with the lowest rating.

It is not easy or even impossible to give all rules in detail how to act if there are problems with colour preference and/or with floats.
Most times computer programs are used to make the pairings of a Swiss system tournament and different programs use slightly different approaches to solve these issues.

## e. The final result

The final classification is in the order of the highest score of the players and for players with the same score the classification is in order of the highest average rating of the opponents.

## Appendix B. Detail description of FMJD Swiss system on Solkoff

The variants of the Swiss system on Solkoff only differ in the tie break rules for players with the same score in the final classification.

## a. Start of the tournament: drawing of lots

Before the start of the tournament the organization or the referee draws lot numbers for all players, or let the players draw a lot number.

## b. Pairing for the first round

For the pairing of the first round the players are ordered on their lot number.
The group of players is divided in two halves: the group A of players with the lowest numbers and the group $B$ of players with the highest numbers. Both groups ordered on lot number.

Then the pairing for the first round is made in which the first player of group A plays against the first player of group B , the second player of group A against the second player of group B.

As there is no relation between the strength of the players and the lot numbers all players from group A may play with white.
Schematically:
A1-B1
A2-B2
A3-B3
etc.

## c. Forming score groups for a next round

After each round the players are grouped into score groups of players with the same score. As much as possible players in the same score group will be paired against each other. The players in each score group are ordered on their Solkoff and SB.

## d. Pairing in a score group

If there is an odd number of players in a score group, the player with the lowest Solkoff and SB is paired with the next lower score group and plays against the player with the highest Solkoff and SB in that group.

However, if the tournament is played with using "floats" this pairing may be changed: if the player in the higher score group already had a "down float" in one or both of the previous 2 rounds then the next higher player in the score group is selected to play against a player of a next score group.
This holds also for the player from the lower score group: if he already has had an "upfloat" in one or both of the previous 2 rounds the next lower player from the lower score group is selected to play against the player of the higher score group.

If no good pairing is possible between the subgroup A and B it is acceptable to move down another player to have a better pairing between subgroup A and subgroup B.

For the pairing in the group all remaining players with the same score are ordered on their Solkoff and SB.

The group of players is divided into two halves: the group A of players with the highest Solkoff and SB and the group B of players with the lowest Solkoff and SB. Both groups are ordered on the Solkoff and SB of the players.
Then the pairing for the round is made in which the highest player of group A plays against the highest player of group B, the second highest player of group A against the second highest of group B .... Etc, just like the pairing for the first round. After the pairing is made the colours are given to the players in such a way that an even distribution of colours to all players is reached as much as possible.

When the tournament is played with weak colour preference then the pairing may be adjusted in case it led to a pairing where it is impossible to give a correct colour to both players. For instance, if both players played two times more with white it is not possible to give them both a correct colour. In principle the pairing is made until a problem of colours is reached. Then the player of the higher group is paired against a next player from the lower group against who it is possible to correctly attribute colours to both players. If necessary, the whole pairing may be changed to get good colour attributions.

However, when it is not possible to give all games in a score group a good colour attribution then it is not allowed to move 2 or more players to another score group.

When the tournament is played with strong colour preference then in odd rounds the colour preference is the first criterion in the pairing process: the group of players with the same score is divided in a group W of players who should play with white and a group B of players who should play with black.

In principle the players of group W play with white against the players of group $B$.

As much as possible the pairing principle of the Swiss system on Solkoff should be obeyed: the group of players with the highest Solkoff and SB play against the group of players with the lowest Solkoff and SB.

It is not easy or even impossible to give all rules in detail how to act if there are problems with colour preference and/or with floats.

Most times computer programs are used to make the pairings of a Swiss system tournament and different programs use slightly different approaches to solve these issues.

## e. The final result

The final classification is in the order of the highest score of the players and for players with the same score the classification is, depending on the Swiss system version in use:

- For the standard FMJD Swiss system (on Solkoff): in order of the highest Short Solkoff truncated (see article 3.1c) and if equal Solkoff Plus (see article 3.1e) and if equal Solkoff Baliakin (see article 3.1f) and if equal Full Solkoff truncated ( see article 3.1d)
- For the FMJD Swiss system on truncated Solkoff: in order of the highest Full Solkoff truncated. See article 3.1.b.
- For the FMJD Swiss system on median Solkoff: in order of the highest Solkoff median and, if equal, the highest Full Solkoff truncated. See article 3.1.b and 3.1.d.

## Appendix D. Tournament performance rating

## Introduction

The tournament performance rating may be used as tie-break criterion between players with the same score, or even as first criterion more important than the final score, to decide about the final result.

The easy way to calculate the tournament performance rating is by using the average rating of the opponents but given the theory of probability behind the ELO rating system it is mathematically not fully correct way to do this.

The performance belonging to an average rating may be something a bit different from the average performance, especially when there is a large variation in the ratings of the opponents.

The tournament performance rating should be calculated on a game by game basis.

## Definition

The tournament performance rating is that rating for which the expected result of the player, calculated opponent by opponent, equals the realized result of the player.

## Annex 6 <br> Rapid and blitz games

## 1. Definition

A game is considered accelerated when the time that is allowed for each player for the whole game is not more than 30 minutes.
There are two categories of accelerated games.
A. The rapid game, where each player is allowed a time between 15 and 30 minutes inclusive for the whole game, or when electronic clocks and the Fischer system are used between 15 and 30 minutes for the first 60 moves.
B. The blitz game, where each player is allowed a time between 5 and 15 minutes inclusive for the whole game, or when electronic clocks and the Fischer system are used between 5 and 15 minutes for the first 60 moves.

## 2. Other Annexes

Apart from the exceptions given below in this Annex, the normal regulations hold.

## 3. Tie breaking.

If tie breaking involves playing decisive games, these must be at the same rate of play or faster than those of the competition.

## 4. Recording Games and Use of Clocks

Recording games is optional, but the use of clocks is obligatory.
For official FMJD tournaments the use of electronic clocks and the Fischer system is obligatory.

## 5. The draw

When the players do not record the games the 40 moves rule is not valid. The players may agree upon a draw only if the number of men for each player is 10 or less.

## 6. Rights of the players

Any player wishing to call the referee for assistance has the right to stop the clocks while his complaint is being considered (contrary to Annex III article 4.4).

Any player who wishes to claim a regulatory draw (see Annex I article 6) may do so. The referee will decide if the claim is correct and if so, he will end the game.

## 7. Rights and duties for the referee

7.1. If the playing time is expired, as marked by the falling of the flag (or the time signal in the case of an electronic clock.), the referee will end the game declaring the game lost for the player who exceeded the allotted time.
7.2 In the endgame phase the referee will keep track of the moves made in such a way that he is able to check the validity of a claim for a regulatory draw.

The following articles (8 through 11) are only valid when not using electronic clocks with the Fischer System, but only using a given time for the whole game.

## 8. Regulation-draw

During rapid or blitz games, if only three kings remain, two king plus a man, or one king and two men, against one king, or only two kings remain, one king and a man, or one king against one king the game shall be considered a draw unless the game has an obvious continuation and the player can demonstrate the win. This end game will not be played and is called a regulation draw.

## 9. Time Shortage

In rapid or blitz games, any player who has one minute or less left on his clock, in the endgame phase with a maximum of 8 pieces total for white and black, has the right to claim a draw if his position is clearly superior.

## 10. Setting of the clock

At the start of the game, each clock must be set in such a way that the flag falls at six o'clock when the allotted time has elapsed.

## 11. Irregularities

If both flags have been fallen the game is considered a draw.

## Annex 8 <br> Regulations for simultaneous games

## A. Regulations for normal simultaneous matches

## 1. Definition

A simultaneous match consists of one player called the 'expert' who plays a certain number of games with several opponents all at the same time.

## 2. Rules of the game

The official FMJD rules for International Draughts must be observed, except for the modification cited in the article 14 below.

## 3. Rules for the competition

The official FMJD competition regulations must be observed, except as regards the notation and the use of clocks and with the modifications and exceptions given in these regulations.

## 4. Playing area

The playing tables must be arranged in a square or a circle. The inner area is reserved for the expert and the referees. The opponents sit on the outer side of the tables.

## 5. Placing the boards

There must be as little space as possible between the boards. During the match the open spaces resulting from finished games may be closed up at the discretion of the expert.

## 6. Procedure

The expert may choose the colour he wishes to play with on all boards. He circulates from one board to the next for each move, always in the same direction he has chosen from the start. The expert imposes therefore himself his tempo.

## 7. Touching the pieces

It is absolutely forbidden to move or touch the pieces at any board when the expert is not present at that board.

## 8. Obligation to Move

Each opponent must make a move as soon as the expert arrives at his board.

## 9. Exchanges and combinations

If after the expert has moved an opponent has only one legal move, then that move must be made immediately. Otherwise the opponent must wait until the expert comes round again.

## 10. Removal of pieces

Pieces removed from the board must be put in their box or removed from the arena.

## 11. (reserved)

## 12 Advice and conversation

Each opponent must play individually. He is forbidden to ask for or receive advice on the game in progress. He is forbidden to speak to the people around him.

## 13. Temporary absence of a player

Any opponent who is absent from his board at the moment that the expert arrives at his board is deemed to have resigned.

## 14. Differences in number of pieces.

A game will be declared lost for any player who has two pieces less than his opponent and no king. He will be asked to resign unless he can demonstrate that his position is not lost.

## 15. Finished games

Any opponent who has finished his game must leave the arena immediately. His place may be taken by another player, thus reducing the distance the expert has to walk.

## 16. Performance

The performance of the expert is better if the number and strength of his opponents and the result is higher. Annex 11 describes the recognition of performances and records.

## 17. Referees

Refereeing should be done by a Main Referee together with as many assistants as required.

## 18. Infringements

Infringements of the regulations must be dealt with by the referees. Serious or repeated infringements may lead to disqualification of the offender.

## B. Regulations for the clock simultaneous matches

## 1. Definition

A clock simultaneous match consists of one player called the 'expert' who plays games with several opponents all at the same time.

## 2. Rules of the game

The official FMJD rules for International Draughts must be observed.

## 3. Rules for the competition

The official FMJD competition regulations must be observed, except as specified in these regulations.

## 4. Playing area

The playing tables must be arranged in a square or a circle. The inner area is reserved for the expert and the referees. The opponents sit on the outer side of the tables.

## 5. Equipment

The equipment, board, clock and notation form must be placed on each table in accordance with the regulations laid down in Annex 3.

## 6. Rate of play

The rate of play for the games, both for the expert and his opponents, is 50 moves for the first two hours and 25 moves per subsequent hour.

## 7. Compulsory Recording

Only the opponents must record the games. The recording forms must be visible at all times for the expert and the referees. At no moment may the notation be suspended.

## 8. Procedure

The expert may choose the colour he wishes to play with on every board. He circulates from one board to another board of his own choice, depending on where he wants to play a move.

## 9. Starting the Clocks

At the start of the match, the referee starts the clock for the player with the white pieces at each board in turn from the first until the last board. From then on each player operates the clock as soon as he has made his move. Opponents do not have to wait until the expert arrives at their board.

## 10. Removal of pieces

Pieces removed from the board must be put in their box or removed from the arena.

## 11. Advice and conversation

Each opponent must play individually. He is forbidden to ask for or receive advice on the game in progress. He is forbidden to speak to the people around him.

## 12. Dispute about number of moves played

If there is a dispute about the number of moves played in a particular game whilst play is still going on the other boards, this dispute must be settled between a referee and the opponent well away from the playing area.

## 13. Request for the referee

The opponent is the only one who is responsible for a correct notation. If the expert was misled about the number of moves made at the moment that his flag falls, the game will be declared lost for his opponent.

## 14. Dispute and correction

Any dispute about moves must be resolved in the opponent's time, unless he is proven to be correct, in which case the referee will restore his clock back to where it was when the dispute arose.

## 15. Finished games

Any opponent who has finished his game must leave the arena immediately. His place may be taken by another player, thus reducing the distance the expert has to walk.

## 16. Temporary absence of a player.

Any opponent who absents himself from his board when he has made his move should put the notation form at the other side of the table, readable for the expert and the referee.

## 17. Differences in number of pieces.

A game will be declared lost for any player who has two pieces less than his opponent and no king. He will be asked to resign unless he can demonstrate that his position is not lost.

## 18. Performance

The performance of the expert is better if the number and strength of his opponents and the result is higher. Annex 11 describes the recognition of performances and records.

## 19. Referees

Refereeing should be done by a Main Referee together with as many assistants as he requires on the basis of one official to 20 players.

## 20. Infringements

Infringements of the regulations must be dealt with by the referees. Serious or repeated infringements may lead to disqualification of the offender.

## C. Regulations for blindfold simultaneous matches

## 1. Definition

A blindfold simultaneous match consists of one player called the 'expert' who plays a certain number of games without seeing any board with several opponents all at the same time.

## 2. Conditions

The expert must either be blindfolded or be in a position where he cannot see any of the opponents' boards and has no board himself. He may also be installed in another room.

## 3. Communication

The expert communicates his moves to opponents via an intermediary, and vice versa.

## 2. Rules of the game

The official FMJD rules for International Draughts must be observed, except for the modification cited in the articles 14,15 and 18 below.

## 3. Rules for the competition

The official FMJD competition regulations must be observed, except as regards the use of clocks and with the modifications and exceptions given in these regulations.

## 6. Playing area

The playing tables must be arranged in a square or a circle. The inner area is reserved for the referees. The opponents sit on the outer side of the tables.

## 7. Compulsory Recording

The opponents must record the games. The recording forms must be visible at all times for the referees.

## 8. Procedure

The expert may choose the colour he wishes to play with on every board. The referee circulates from one board to the next for each move, always in the same direction he has chosen from the start. The tempo is imposed by the expert. Every move at every board the referee or the expert announces the name of the opponent or the board number as agreed beforehand with the expert. The referee announces the move made by the opponent and the expert announces his move which is then repeated by the referee. Only when the move is repeated by the referee and not immediately corrected by the expert the move is considered to be completed and is executed on the board by the referee. Directly after the referee has repeated the move the expert still has the right to correct his move.

## 9. Touching the pieces

It is absolutely forbidden to move or touch the pieces at any board when the referee is not present at that board.

## 10. Obligation to Move

Each opponent must make a move as soon as the referee arrives at his board.

## 11. Exchanges and combinations

If after the expert has moved an opponent has only one legal move than that move must be made immediately. Otherwise the opponent must wait until the expert comes round again.

## 12. Removal of pieces

Pieces removed from the board must be put in their box or removed from the arena.

## 13. Advice and conversation

Each opponent must play individually. He is forbidden to ask for or receive advice on the game in progress. He is forbidden to speak to the people around him.

## 14. Temporary absence of a player

Any opponent who absents himself from his board at the moment that the referee arrives at his board is deemed to have resigned. In special circumstances, to be discussed with the expert, the player is allowed not to be present. He should have made his move and put the
notation form at the other side of the table, readable for the referee. If his move is irregular the opponent is deemed to have resigned.

## 15. Differences in number of pieces.

A game will be declared lost for any player who has two pieces less than his opponent and no king. He will be asked to resign unless he can demonstrate that his position is not lost.

## 17. Performance

The performance of the expert is better if the number and strength of his opponents and the result is higher. Annex 11 describes the recognition of performances and records.

## 18. Referees

Refereeing should be done by a Main Referee together with as many assistants as required.

## 19. Infringements

Infringements of the regulations must be dealt with by the referees. Serious or repeated infringements may lead to disqualification of the offender. This holds also for the expert. If he repeatedly makes illegal or impossible moves the game will be declared lost for him. The maximum number of errors allowed is the total number of opponents divided by 4 rounded up to the nearest integer value.
If the expert makes more than 2 errors in one game or more than the maximum number of errors allowed in the total simultaneous match the game where the error occurs will be declared lost for him.

An illegal move has to be replaced by a legal move by the expert. Contrary to annex 1 , article 3.11 the expert is not obliged to play the "touched" piece.
If the expert makes an impossible move the referee will inform him about the status of the two fields on the board related to this move. He will inform him about the status of the field from where the impossible move is made and about the field to which the impossible move is made. When it is clear that the expert is thinking to be playing at another board he may correct the move without it being considered an error.
When the expert makes a "notation error" (e.g. giving the notation of a move as if he was playing with black instead of white) this is not considered to be an error

## D. Regulations for the edraughts clock simultaneous matches

## 1. Definition

An edraughts clock simultaneous match consists of one player called the 'expert' who plays games on a computer with several opponents also playing on a computer all at the same time. It is not necessary that all players are at the same venue during the event.

## 2. Rules of the game

The official FMJD rules for International Draughts must be observed, except as specified in these regulations.

## 3. Rules for the competition

The official FMJD competition regulations must be observed, except as specified in these regulations. There is no obligation to make a notation as the software keeps the notation up to date. All rules regarding the form and size of the tables and the draughts material and clocks in Annex 3 article 3, are not applicable.

## 4. Equipment

The expert makes his moves on a computer. He may choose a next board to play on based on methods defined in the software. The opponent also makes his moves on a computer.

All rules regarding the form and size of the draughts material and clocks in Annex 3 article 3 , are not applicable.

## 5. Rate of play

The rate of play for the games, both for the expert and his opponents, is 50 moves for the first two hours and 25 moves per subsequent hour.

## 6. Recording of the moves

There is no obligation to make a notation as the software keeps track of the recording of the moves

## 7. Procedure

The expert may choose the color he wishes to play with on every board. He circulates from one board to another board of his own choice, depending on where he wants to play a move. The opponent may make his move on any moment he likes and does not need to wait till the expert selects his board.

## 8. Starting the Clocks

At the start of the match, the referee will start the event in the software, which automatically starts all clocks for the players with the white pieces.

## 9. Advice and conversation

Each opponent must play individually. He is forbidden to ask for or receive advice on the game in progress. He is forbidden to speak to the people around him.

## 10. Illegal moves

All rules regarding the illegal move, given in Annex 1 article 5 irregularities and in Annex 3 article 2.5 a procedure for irregular moves are not applicable as the computer software prohibits the possibility to make an illegal move.

## 11. Regulatory draws

The player or referee does not have to claim, or check for, a regulatory draw as given in Annex 1 article 6 , as the software checks and decides about a regulatory draw.

## 12. Differences in number of pieces.

A game will be declared lost for any player who has two pieces less than his opponent and no king. He will be asked to resign unless he can demonstrate that his position is not lost.

## 13. Performance

The performance of the expert is better if the number and strength of his opponents and the result is higher. Annex 11 describes the recognition of performances and records.

## 14. Referees

Refereeing should be done by a Main Referee together with as many assistants as he requires on the basis of one official for 20 competitors.

## 15. Infringements

Infringements of the regulations must be dealt with by the referees. Serious or repeated infringements may lead to disqualification of the offender.

## Annex 9 <br> FMJD rating system and its application rules

## 1. Introduction

1.1. Goal of the rating system.

To assign a rating to each draughts player belonging to a national federation affiliated to the FMJD, participating in official competitions of the FMJD and recognized international and national competitions of the FMJD, according to results realized in these approved competitions.

The FMJD establishes several international rating lists:
a. the players in international draughts on 100 squares (male and female)
b. the players in 64 squares draughts (male and female)
1.2. Competitions.
1.2.1 $\quad$ The following competitions are used for ratings calculations:
1.2.1.2. all official competitions of the FMJD (including Confederations)
1.2.1.2. all national championships (also qualification rounds)
1.2.1.3. any other competition announced to the FMJD (office and/or Tournament Director) at least 2 weeks before the 1 st round
1.2.2. Additional conditions for the competitions:
1.2.2.1. All games with time control minimum 30 minutes (1-hour total for both players) for the first 60 moves are countable for ratings. The development factor (see article 3.2.3) is:
(a) $100 \%$ (not reduced) for time control minimum 2 -hours per player (4-hours total for both players) for the first 60 moves
(b) $60 \%$ for time control minimum 1-hour and 30 minutes per player (3-hours total for both players) for the first 60 moves.
(c) $40 \%$ for time control minimum 1-hour per player (2-hours total for both players) for the first 60 moves.
(d) $20 \%$ for time control minimum 30 minutes per player (1-hour total for both players) for the first 60 moves.
1.2.2.2. Games played as rapid - blitz or superblitz are counted for separate rating list "rapid-blitz". These are the games with time control below 30 minutes (1-hour total for both players) for the first 60 moves. Development factor is:
(a) $100 \%$ (not reduced) for time control maximum 15 minutes per player ( 30 minutes total for both players) for the first 60 moves
(b) $50 \%$ for time control above 15 minutes but less than 30 minutes per player (above 30 minutes and less than 1-hour total for both players) for the first 60 moves.
1.2.2.3. General rules of annex 3 are used.
1.2.2.4. $\quad$ Rating service is free if results are delivered in the form defined at art. 4.
1.3. The reporting of competitions.

The reporting of the competition is always the duty and the responsibility of the main referee. It should be done fully according to article 4 of this annex.
If the referee has not fulfilled its obligation, the report must be made by the tournament director of the FMJD, Confederation or Federation, depending on type of the competition.
1.4. Use of the rating system

The role of the General Assembly is to set the policy for the allocation of titles. The role of the rating system is to provide scientific measurements of the best statistical quality that allow the FMJD to give titles of equal value for equal performances.
1.5. National ratings and FMJD ratings

To estimate the strength of a player without rating for use in the Swiss system on rating the national rating of the player may be used. However, this estimated rating does not count for the calculation of rating or title norms for the other players.
If a player has only a national rating, we use this national rating and the formula given below to estimate the FMJD rating of a player.
Only if we have a player without any rating it is up to the referee to make an estimation as good as possible.
The Technical Committee will publish the formulas to calculate the FMJD rating from the national rating every two year by using statistical methods in comparing the ratings for players who have an FMJD rating and a national rating. These formulas will be published regularly on the FMJD website based on basic data received from National Federations.

From August 2019 the following formulas are valid

$$
\begin{array}{ll}
\text { FMJD }=0,7443 * \text { Belgium }+460,221 & \text { FMJD }=0,5906 * \text { Netherlands }+ \text { 1385,095 } \\
\text { FMJD }=0,4490 * \text { Poland }+1016,326 & \text { FMJD }=1,1693 * \text { FMJDblitz -347,58 }
\end{array}
$$

## 2. General Principles

2.1. Principle of the system (ELO system).

The FMJD rating system is a numerical system in which the results in percentages are converted into differences in rating and, conversely, rating differences are converted into probabilities of results
2.2. Base of the system

The base of the system is the Gaussian function of the theory of statistics. It is shown in the conversion table specified in Article 2.3.
2.3. Table to convert results into rating differences (IX-1).

Interpolation formula. The interpolation formula for the rating difference $\mathrm{D}(\mathrm{Pr})$ belonging to non-integral percentages Pr is:
$\mathbf{D}\left(\mathbf{P r}_{r}\right)=\mathbf{D}\left(\mathbf{P}_{1}\right)+\left(\mathbf{P r}-\mathbf{P}_{1}\right)\left[\mathbf{D}\left(\mathbf{P}_{\mathbf{1}}+\mathbf{1}\right)-\mathbf{D}\left(\mathbf{P}_{1}\right)\right] \ldots \quad \mathrm{P}_{1}$ being the integral number of $\mathrm{P}_{\mathrm{r}}$
[table IX-1] Conversion table from the result in percentage P to the rating difference $\mathrm{D}(\mathrm{P})$

| P | $\mathrm{D}(\mathrm{P})$ | P | $\mathrm{D}(\mathrm{P})$ | P | $\mathrm{D}(\mathrm{P})$ | P | $\mathrm{D}(\mathrm{P})$ |
| :--- | :--- | :--- | :--- | :--- | ---: | :--- | :--- |
| 1,00 | 935,00 | 0,75 | 192,71 | 0,50 | 0,00 | 0,25 | $-192,71$ |
| 0,99 | 664,74 | 0,74 | 183,80 | 0,49 | $-7,14$ | 0,24 | $-201,82$ |
| 0,98 | 586,85 | 0,73 | 175,05 | 0,48 | $-14,34$ | 0,23 | $-211,82$ |
| 0,97 | 537,54 | 0,72 | 166,54 | 0,47 | $-21,48$ | 0,22 | $-220,57$ |
| 0,96 | 500,31 | 0,71 | 158,11 | 0,46 | $-28,71$ | 0,21 | $-230,42$ |
| 0,95 | 470,00 | 0,70 | 149,82 | 0,45 | $-35,38$ | 0,20 | $-240,48$ |
| 0,94 | 444,00 | 0,69 | 141,65 | 0,44 | $-43,14$ | 0,19 | $-250,80$ |
| 0,93 | 421,62 | 0,68 | 133,62 | 0,43 | $-50,40$ | 0,18 | $-261,51$ |
| 0,92 | 401,51 | 0,67 | 125,71 | 0,42 | $-57,62$ | 0,17 | $-272,62$ |
| 0,91 | 383,02 | 0,66 | 117,82 | 0,41 | $-64,97$ | 0,16 | $-284,14$ |
| 0,90 | 366,17 | 0,65 | 110,11 | 0,40 | $-72,37$ | 0,15 | $-296,14$ |
| 0,89 | 350,37 | 0,64 | 102,40 | 0,39 | $-79,77$ | 0,14 | $-308,68$ |
| 0,88 | 335,71 | 0,63 | 94,80 | 0,38 | $-87,28$ | 0,13 | $-321,80$ |
| 0,87 | 321,80 | 0,62 | 87,28 | 0,37 | $-94,80$ | 0,12 | $-335,71$ |
| 0,86 | 30,68 | 0,61 | 79,77 | 0,36 | $-102,40$ | 0,11 | $-350,37$ |
| 0,85 | 296,14 | 0,60 | 72,37 | 0,35 | $-110,11$ | 0,10 | $-366,17$ |
| 0,84 | 284,14 | 0,59 | 64,97 | 0,34 | $-117,82$ | 0,09 | $-383,02$ |
| 0,83 | 272,62 | 0,58 | 57,62 | 0,33 | $-125,71$ | 0,08 | $-401,51$ |
| 0,82 | 261,51 | 0,57 | 50,40 | 0,32 | $-133,62$ | 0,07 | $-421,62$ |
| 0,81 | 250,80 | 0,56 | 43,14 | 0,31 | $-141,65$ | 0,06 | $-444,00$ |
| 0,80 | 240,48 | 0,55 | 35,38 | 0,30 | $-149,82$ | 0,05 | $-470,00$ |
| 0,79 | 230,42 | 0,54 | 28,71 | 0,29 | $-158,11$ | 0,04 | $-500,31$ |
| 0,78 | 220,57 | 0,53 | 21,48 | 0,28 | $-166,54$ | 0,03 | $-537,54$ |
| 0,77 | 211,05 | 0,52 | 14,34 | 0,27 | $-175,05$ | 0,02 | $-586,85$ |
| 0,76 | 201,82 | 0,51 | 7,14 | 0,26 | $-183,80$ | 0,01 | $-664,74$ |
|  |  |  |  |  |  | 0,00 | $-935,00$ |

P is the result percentage.
$\mathrm{D}(\mathrm{P})$ is the rating difference between a player and his opponent(s)
2.4. Conversion table for the expected percentage as function of the rating difference
2.4.1. Formula

The expected percentage as function of the rating difference is calculated with the help of the following formula:
$\mathbf{P}_{e}=\frac{\mathbf{D}\left(\mathbf{P}_{\mathbf{e}}\right)-\mathbf{D}\left(\mathbf{P}_{1}+\mathbf{1}\right)}{\mathbf{D}\left(\mathbf{P}_{\mathbf{1}}+\mathbf{1}\right)-\mathbf{D}\left(\mathbf{P}_{\mathbf{1}}\right)}+\mathbf{P}_{\mathbf{1}}$
$\mathrm{P}_{1}$ is the percentage for which $\mathrm{D}\left(\mathrm{P}_{1}\right)<=\mathrm{D}\left(\mathrm{P}_{\mathrm{e}}\right)<=\mathrm{D}\left(\mathrm{P}_{1}+1\right)$
$\mathrm{P}_{1}$ being the integral number of $\mathrm{P}_{\mathrm{r}}$
2.4.2. Conversion table from the rating difference to the expected percentage result for the higher rated player $(\mathrm{H})$ and the lower rated player $(\mathrm{L})$ is presented in the end of this annex.

An example of how this table was created from the table in article 2.3.
Player rating $=2150$, average rating of his opponents $=2050$
$\mathrm{Pe}=\frac{100-102,40}{102,40-94,80}+0,64=(-2,4 / 7,6)+64=63,6842 \%$

## 3. Application formula of the rating system

3.1. Performance of a player

General Formula.
Evaluation of the performance of a player. The performance rating of a player in a competition (independent from his new rating at the end of the competition) is given by the formula:

$$
\mathbf{R p}=\mathbf{R c}+\mathbf{D}(\mathbf{P})
$$

where:
Rp is the performance rating
Rc is the average rating of the opponents (or average performance)
$\mathrm{D}(\mathrm{P})$ is the rating difference based on the percentage of the result as given in table IX-1

## Example:

Player rating $=2150$, average opponents rating $=2050$,
players result $=9$ points in 7 games ( $64,286 \%$ )
$\mathrm{Rp}=2050+102,40+(64,286-64) *(110,11-102,40)=2050+104,6=2155$
3.2. Calculation of the difference in rating
3.2.1. Calculation of the expected result

The expected result is calculated by the formula:

## 2 * number of games <br> $\mathbf{W e}=\mathbf{P e}$ *

100
where Pe is the expected percentage based on the difference in rating between the player and the average rating of the opponents as given in table IX-2.
Example:
Player rating $=2150$, average opponents rating $=2050$, tournament has 7 rounds.
Pe (from example 2.2.2) 63,6842\%
$\mathrm{We}=63,6842 * 2 * 7 / 100=8,9158$
3.2.2. General formula

The change in rating after a performance (competition/event) is given by:
$\Delta R=0,5 * K(W-W e)$
where:
$\Delta \mathrm{R}$ is the change in rating
W is the score of the player in the tournament (not counting regulatory results): 2 for winning, 1 for a draw.

We is the expected result based on the rating difference
K is the development factor
Example:
Player rating $=2150$, average opponents rating $=2050$,
players result - 9 points in 7 games ( $64,286 \%$ )
$\Delta \mathrm{R}=0,5^{*} 15^{*}(9-8,9158)=7,5^{*} 0,0842=0,6315$, or $\Delta \mathrm{R}=0,5^{*} 10^{*}(9-8,9158)=0,421, \ldots$
3.2.3. The development factor K

The development factor K is used as stabilizing factor in the system.
$\mathrm{K}=25$ for a player new to the rating list until he has completed events with at least 30 games
$\mathrm{K}=15$ as long as a player's rating remains under 2300
$\mathrm{K}=10$ once a player's published rating has reached 2300 and remains at that level subsequently, even if the rating drops below 2300 .

K may change within one calculation period.
Also tournaments with reduced thinking time are accepted for the FMJD rating system. If the thinking time is at least 3 hours per game, the development factor K in the rating calculation is reduced to $50 \%$ of the normal factor.
3.3. Calculating the new rating after a period
3.3.1. General formula for players who have played 25 games or more.

The new rating after one or more performances may be calculated by:
$\mathbf{R n}=\mathbf{R o}+\boldsymbol{\Sigma} \Delta \mathbf{R}$
where:
Ro is the old rating
Rn is the new rating
$\Sigma \Delta \mathrm{R}$ is the sum of the rating changes as calculated by the formulas given in art.3.2.
3.3.2. Special case for a player who did not yet play 25 games

The new rating after one or more performances is equal to the average performance of the player:

For the first result the rating is calculated by the formula in art.3.1.1. $\mathrm{Rp}=\mathrm{Rc}+\mathrm{D}(\mathrm{P})$.
To avoid difficulties with players with $0 \%$ or $100 \%$ the maximum is set to 2400 and the minimum to 1900 .

The performance after a next result may be calculated by the linear interpolation formula:

where:
Ro = performance rating until the new result
R1 = performance of the new result as given by formula 3.1.1
NPo = number of games played until the new result
NP1 = number of games from the new result

## 4. Procedure for the report of a competition

4.1. The competition should be reported to the FMJD within 7 days after the last round.

This is the deadline, and as it written in article 1 , the main referee is personally responsible for this. For reporting a tournament, the referee needs to use free official FMJD software (Draughts Arbiter PRO [DAP]). There is an icon with FMJD logo called "publishing tournament". Then a short form should be filled. This is all to be done.
DAP is the only software to be used for World Championships and World Cups.
DAP has also the possibility to import data from a text file (definition at point 11), so this is support for the referee who is using another software tool.

For an official FMJD event like World Championship or officially recognised by FMJD like World Cup the main referee should send independently to FMJD office written report about tournament and assistant referees. This can be done also for any other event. This should be sent at ratings@fmjd.org.
The actual addresses should be checked on the FMJD web-site.
4.1.1. The report consists of:
(a) Information about the competition:
(b) information about the referee staff (names, contacts - specially emails, languages)
(c) basic information about the competition (name, dates, place, sponsors, ...)
(d) basic technical facts about the tournament (system, time control, etc.)
(e) clear and full information about any special technical cases (winning games by referee decisions etc.)
(f) any other remarks if necessary
4.2. Reporting tournament in other form.

The competition should be reported to the FMJD within 7 days after the last round. This should consist of report and results. Rating service for this form of report is not free.
4.2.1. The report consists of:
(a) all information like at point 4.1.1.
(b) confirmation of paying rating service
4.2.2. Tournament results

It should be done in one clear table. In individual tournaments it is not useful to send the results round by round.

The following information should be presented in the table:
4.2.2.1.

FMJD-ID
4.2.2.2.

First Name
4.2.2.3.

Surname
4.2.2.4.

FMJD-title
4.2.2.5. FMJD-rating
4.2.2.6. federation
4.2.2.7. birthday (obligatory for the players without FMJD-ID)

The FMJD-IDs of all players may always be found on the FMJD web site as a text file and a database file.
4.2.4. A report must be made in one of official languages of the FMJD. Any Dutch, Polish, German, Italian, ..., Japanese texts are FORBIDDEN.
4.2.5. Other remarks:
4.2.5.1 $\quad$ First Names and surnames always should be presented using only English letters. The maximum length for each - 17 letters.
4.2.5.2. It is forbidden to use short versions like A. Dames or Jacek v/d Big. ALWAYS use full first names and surnames.

Example of a CORRECT presentation of a swiss tournament:
19245 gmi Andrew Svitskovsy jp $2 / 27 \quad 2 / 32 \quad 1 / 2 \quad 2 / 7 \quad 2 / 3 \quad 0 / 4 \quad 2 / 511$

4.3. Period of validity of a rating list

The rating list is valid for a 3-month period. It is valid for the tournament results received in the 3-month period between two lists. The lists are published on January 1, April 1, July 1 and October 1 of each year.
4.4. Period of the validity of a rating

The period for the validity of a rating is from December 15 to March 15 (more or less), from March 15 to June 15, from June 15 to September 15 and September 15 to December 15. All tournaments ended in this period are used the calculate the rating of the following list.
4.5. The deadline for sending the tournament reports

The reports have to be sent to the FMJD within 7 days after the last round of the tournament.
4.6. National ratings official

Every national federation has to assign someone responsible for the coordination with the FMJD and responsible for sending the tournament results to the FMJD. His name has to be given to the FMJD bureau.
4.7. Errors

Incomplete reports, reports not sent or sent too late are not taken into consideration.

## 5. Procedure of calculations

5.1. Control of the general referee report

After reception of the result, the responsible verifies the general referee report for the validity of the ratings and for the attribution of titles.

### 5.2. Own rating

This is the rating published on the official rating list valid on the day of the 1st round of the competition. Players without rating (not present on list a , list b or list c ) get a rating of 2100 as his own only for calculation of title norms. For exclusively women competition this value is 2000 .
5.3. Calculation of the average rating of the opponents

Games with players without rating (not present on list a , list b or list c ) are not taken into account. Games which are not played do not count for rating.
5.4. Calculation of the rating changes

After each tournament the responsible for fmjd rating calculates the change in rating Delta R of every participant by using the formula in Article 3.2.1. with the right factor $K$.
5.5. Calculation of the new rating

The new rating for the next list (see article 3.3) is calculated after the closing date when all tournament results received have been calculated for all players.

## 6. Official rating list

The FMJD publishes several rating lists:
a. The official FMJD rating list will be formed from players who are active, i.e.:

- players with rating above 2350 having played at least 30 games counting for rating in the last 3 years.
- players with rating below 2351 having played at least 1 game counting for rating in the last 3 years.
b. The full FMJD rating list consisting of all players with a valid rating

Other special lists may be published also, like lists of youth players etc.
6.1. Frequency of the rating list

Four times in a year the responsible for the rating prepares a new rating list which is published after agreement of the FMJD. The list is published in decreasing order of ratings for all players. All players with a valid rating will be published on an alphabetic list.
6.2. Publication of the rating list

The rating publication has the following parts
a. the closing date for the period, normally March 15, June 15, September 15, December 15. Only in exceptional cases a tournament reported after this date is taken into consideration.
b. the date of application, normally January 1, April 1, July 1, October 1.
c. The list of tournaments calculated;
d. the rating of all players in the list;
f. the number of games valid and calculated for each player since the start of the rating list.
6.3. Lists A, B and C

The players are classified in three categories A, B and C. The players with a rating lower than 2300 and a minimum of 30 games and the players with a rating above 2300 and a minimum of 50 games (for the players with a rating above 2351 additionally minimum 30 played in the last 3 years) are on list A . The other players who did play in the last three years are put on list B and the other players on list C .
6.4. Players who are not active.

Players who did not play for 3 years will be put on list B and players who did not play for 5 years are put on list C .
6.5. Players without rating

For the calculation of titles players without rating get a rating of 2100. For exclusively women competition this value is 2000 .
The rules for titles are described in Annex 10.

## 7. Control of the functioning of the rating list

7.1. Level of rating

The level of the rating is arbitrary. Only the differences in rating have a meaning in terms of probabilities.
7.2. Validity of the system

The validity of the system is respected if the same rating expresses the same strength of a player from year to year.
7.3. Detection of deviations in the rating system

The responsible person for the FMJD rating system has the important task to study deviations in the rating system and to preserve the validity of the rating system.
7.4. Possible study of changes in the rating system

The detection of changes in the rating system may be made by:
a. studying the rating of a chosen group of players, e.g. from 25-40 years old, to detect a possible change in the average rating of the group.
b. studying the average rating of the top 50 players.
c. studying of the division of ratings for the whole group of players.

## 8. Competence of the responsible person of the FMJD rating system

8.1. Knowledge of the theory

The responsible needs to have an adequate knowledge of the theory of statistical probabilities in their application to the physical and behavioural sciences.
8.2. Study of changes

He must be able to organize the studies described in article 7.5 and interpret the results and, if necessary, give advice to the Executive Council to take measures to preserve the validity of the rating system.
8.3. Understanding the impact of new players.

He needs to be able to determine the overall composition of all rated players and the direction of change. In particular, he must understand the impact of new players who are progressing on the whole; he must also be sensitive to changes in the value of players based on age.
8.4. Help to federations

He has to be willing to help a national federation that wants to establish a national rating system, comparable with the FMJD rating system.
8.5. Objectivity

In all his activities for the rating system he needs to show the same objectivity as which can be expected form a referee of the FMJD.

## 9. Summary of abbreviations used

$\operatorname{Pr}$ : Realized percentage for a player in a tournament;
$\mathrm{D}(\mathrm{P})$ : theoretical difference in rating
$\mathrm{N}: \quad$ Number of participants in a tournament;
Rp : Performance rating of the players $\mathrm{Rp}=\mathrm{Rc}+\mathrm{D}(\mathrm{P}) \mathrm{a}$
Rc: Average rating of the opponents

Rm : Average rating of the participants with $\mathrm{Ru}=2100$ (2000 for the women) for players without rating (only for Annex 10),
$\Delta \mathrm{R}$ : Change in rating
W : Realized score in a tournament ( 2 points for winning, 1 point for a draw and 0 points for a loss)

We: Expected score
Pe : Expected percentage
K: Development factor
M : number of opponents
Rn : New rating
Ro : Original rating before the start of a tournament
$\Sigma \Delta \mathrm{R}$ : Sum of the rating changes
Ru : theoretical rating for players without rating, 2100 (2000 for women), only for titles, see Annex 10

## 10. Application of these regulations

The initial rating has been calculated by using official international competitions since the World Championship in Arco in 1978 and also other recognized international individual and team competitions and national championships since the World Championship in Bamako 1980.

The first rating list of January 1, 1983 serves as starting point of the FMJD rating system.
After January 1, 1983, all recognized tournaments have been calculated for the FMJD rating.

After January 1,1984 also all national championships, finals and semi finals, have been taken into consideration.

The same regulations are valid for the rating list of the players in the section 64 .
The first rating list for the section 64 has been calculated after the world Championship 1985 in Lecce. After that date all recognized tournaments have been calculated for the 64 rating list.

The same rules have been used for a number of years for the rating list of the correspondence players since 1987.

## 11. FMJD official format for tournament data

General remark - use only standard letters like in English alphabet - also any comments etc in English only.
<section Info>
name $=$ text with tournament name maximum length $c(30)$
played from $=\mathrm{DD} / \mathrm{MM} / \mathrm{YYYY}$
played to $=\mathrm{DD} / \mathrm{MM} / \mathrm{YYYY}$
type = possible value here: SWISS, ROUND, TEAMS, OTHER
national championship $=\mathrm{Y} / \mathrm{N}$ Y-only in case when it is FINAL of National Championship
women championship $=\mathrm{Y} / \mathrm{N}$
name of referee $=$ text - maximum length $c(25)$
place $=$ text with tournament place maximum length $\mathrm{c}(30)$
country $=\mathrm{c}(3)$ code (see general remarks about country code) of country
remarks $=<$ remark $>$ free text - not limited $</$ end remark $>$
winner $=$ text - maximum length $\mathrm{c}(25)$ (name of player or team)
</end info>
<section players>
each line contains info about one player in the following form:
fmjd-ID, players number in tournament, local ID, place, points, first name, last name, country, born, sex
example:
11285,7,124,3,12,jacek,pawlicki,pl,02/01/1960,M
comments:
generally - number of comas should be always the same (!) - 9 even some of fields are empty fmjd-ID - clear n(5) - if no then 0 (zero)
tournament number - n(3) OBLIGATORY
local ID - local ID number $c(6)$ - if no then empty
place $-\mathrm{n}(3)$ place in tournament, if team competition, place of team, if individual competition then each number unique !!!, if tournament not finish yet (for example report from part of the season in Dutch NC) then 0 for all
points $-\mathrm{n}(3)$ amount of points - OBLIGATORY (very important for general control)
first name - c(17)
last name - c(17)
country - c(3) code of country - see general remark below
born - DD/MM/YYYY obligatory for Youth and veteran competitions
sex - W/M - clear not necessary to fulfil when fmjd-ID exist
</end players>
<section results>
each line contains result of ONE game:
round, tournament number player with white, tournament number of second player, result
example:
1,1,22,2-0
comments:
All fields obligatory
Tournaments numbers - according 2nd field in "Section players"
If pause game (against dummy) - then player number $=0$
Results possible:
2-0, 0-2, 1-1
if results based on referee decision then we mark it as follow:
$2 \mathrm{x} 0,0 \times 2,1 \mathrm{x} 1$, or $0 \times 0$
</end results>

Country code according to fmjd database - codes based on ISO:
http://www.iso.org/iso/en/prods-services/iso3166ma/02iso-3166-code-lists/list-en1.html

Annex 9 - FMJD rating system and its application rules
[table IX-2] Expected percentage as function of the rating difference
1 st column - ratings difference, 2nd column - theoretical result for highest rating, 3rd column - for lowest rating

## Annex 10 <br> FMJD regulations for recognition of international titles

## Preamble

The regulation concerns the recognition and ratification of the following titles:

- Candidate FMJD Master (CMF)
- FMJD master (MF);
- International Master (MI);
- International Grandmaster (GMI);
- Candidate FMJD Master Women (CMFF)
- FMJD master women (MFF);
- International Master women (MIF);
- International Grandmaster women (GMIF);

These titles can also be obtained for the international game on the 64 board. They have another abbreviation like CMF 64, MF 64, MI 64, GMI 64, ....

## 1. General Remarks

1.1. Attribution of titles

The FMJD awards to players the titles described in this Annex on proposal of the national federation. This proposal has to be sent including the documents about the referred competitions. The attribution of titles is valid immediately but is presented to and approved by the next General Assembly of the FMJD. The proposal can also be made by the Technical committee of the FMJD.
1.2. Recognition of titles

The FMJD only recognizes titles that have been awarded conforming to these regulations. Titles and norms can be obtained only in the events also fully counted for rating (time control minimum 3 hours total for both players for the first 60 moves). A player needs to play minimum 7 games to obtain a norm or a title.

### 1.3. Validity of titles

The titles are valid from the moment of registration and are valid for life.
1.4. Use of titles

Use a title of FMJD or a classification to infringe the moral principles of the rules of titles or rating of the FMJD may be sanctioned with withdrawing the title on proposal of the

Executive Council of the FMJD and after a final decision of the General Assembly of the FMJD.

## 2. Types of titles and norms

2.1. The following types of titles are recognized by the FMJD:
2.1.1. Automatic titles: these titles can be obtained automatically by one excellent result in a World Championship or continental Championship (see article 3)

For all conditions for titles and norms a GMI counts only as a GMI if he has a rating of 2300 or higher, and an MI counts only as an MI as he has a rating of 2250 or higher. A GMI with a rating between 2300 and 2250 counts the same as an MI. Below 2250 a GMI and MI count as an MF.

The same condition holds for female titles and norms: A GMIF counts only as a GMIF if she has a rating of 2165 or higher and an MIF counts as an MIF with a rating of 2090 or higher. Below 2090 a GMIF and MIF count as an MFF.
2.1.2 Titles through norms: these titles can be obtained by a number of results (norms) in official competitions of the FMJD or competitions approved by the FMJD.
2.2. Types of norms

There are two kinds of norms: black norms and red norms.
Black norms are the standard norms.
Red norms are special norms.
The conditions for obtaining such a red norm are heavier than for black norms.
To obtain a title of MI or GMI at least one of the norms need to be a red norm.
The details are explained in article 4.4

## 3. Automatic Titles

3.1. World Championship, World Championship Women, and European Championship, European Championship Women and African Championship..
3.1.1. The title of GMI for the players 1,2 and 3
3.1.2. The title of MI for the players 4,5 and 6
3.1.3. The title of MF for the players 7, 8 and 9
3.2. (deleted)
3.3. (deleted)
3.4. Other Continental Championship with 16 players minimum. Championship of Asia and championship of America
3.4.1. The title of GMI for the player 1
3.4.2. The title of MI for the player 2
3.4.3. The title of MF for the player 3

For a Continental Championship with less than 16 players but minimum 8 players the champion will be MI.
3.5. World Championship and European Championship Juniors boys and girls and World Championship and European championship youth until 23 (section 64)

The title of $\operatorname{MF}(F)$ for the players 1,2 and 3
If the champion already has the title MF before the start of the tournament, he / she will get the title $\mathrm{MI}(\mathrm{F})$.
3.6. Continental Championship juniors Asia, Africa, America
3.6.1. $\quad$ The title of $\mathrm{MF}(\mathrm{F})$ for the champion
3.6.2. The title of $\mathrm{CMF}(\mathrm{F})$ for the players 2-3
3.7. World Championship and European championship cadets
3.7.1. $\quad$ The title of $\mathrm{MF}(\mathrm{F})$ for the champion.
3.7.2. The title of $\operatorname{CMF}(F)$ for the players 2-3
3.8. Continental Championship cadets Asia, Africa, America

The title of $\operatorname{CMF}(\mathrm{F})$ for the players 1-3
3.9. World Championship and all Continental Championship mini cadets

The title of $\mathrm{CMF}(\mathrm{F})$ for the players 1-2
3.10. World Championship and all Continental Championship hopes

The title of $\mathrm{CMF}(\mathrm{F})$ for the champion
3.11. Extended possibilities to get $\mathrm{CMF}(\mathrm{F})$ title automatically
3.11.1. $\quad 1^{\text {st }}$ place in National Championship
3.11.2. place 1-3 in EC Veterans
3.11.3. Score +2 in any World Cup or continental championship event
3.11.3.a. Participation in the World Championship (so each participant will play with FMJD title!)
3.11.4. Continental championships / World cup events: place above 3 players with $\operatorname{GMI}(\mathrm{f}) / \mathrm{MI}(\mathrm{f})$ title or 5 with $\operatorname{MF}(\mathrm{f}) / \mathrm{MI}(\mathrm{f}) / \mathrm{GMI}(\mathrm{f})$ title
3.11.5 Rating on list a minimum 2120 for cmf or 2020 for cmff
3.12. An automatic title is available in all individual official World and Continental championships played under conditions valid for an automatic the title. This will be given to the player who finished above 5 players with the title requested or a higher title.

Examples: score above 2 GMI and 3 MI, give rights to automatic MI title, score above 5 GMI gives rights to GMI title, score above 4 GMI and 1 MF gives rights to MF title etc
3.13. For many automatic titles also, an automatic norm will be given, see the table $\mathrm{X}-1$ at the next page and the remarks $3,4,5$ )

## 4. Titles through norms

4.1. Results considered:

Results (or norms) acquired in international tournaments of the FMJD or those approved by the FMJD.
4.2. Reference competitions

The norms which are considered for titles acquired by the realization of norms in international competitions must have been fulfilled in a number of the following competitions:
a official competitions of the FMJD
b International tournament approved by the FMJD, following the recognition procedure in the internal regulations of the FMJD.
c team meetings between national federations which are considered to be approved international tournament when they respect the requested reference criteria.
Criteria for approving competitions for titles and norms

| [table X-1] |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Tournament | gmi/gmif | mi/mif | mf/mff | cmf/cmff |
| World Championship ${ }^{1}$ | 1-3 | $4-6^{3}$ | 7-94 | $10-\ldots{ }^{5}$ |
| World Championship women |  |  |  |  |
| European Championship |  |  |  |  |
| African Championship |  |  |  |  |
| Continental Championship America, Asia with 16 players minimum | 1 | $2^{3}$ | $3^{4}$ | $4-6{ }^{5}$ |
| World Championship and European championship junior boys / girls and youth until 23 (section 64) | - | $1^{2}$ | 1-2-3 ${ }^{4}$ |  |
| Continental Championship juniors Africa, America, Asia |  |  | $1^{4}$ | $2-3^{5}$ |
| $\begin{aligned} & \text { World Championship / European } \\ & \text { Championship cadets } \end{aligned}$ |  |  | $1^{4}$ | $2-3^{5}$ |
| Continental Championship Cadets Africa, America, Asia |  |  |  | $1-3^{5}$ |
| World championship and Continental Championship Mini-Cadets |  |  |  | $1-2^{5}$ |
| World championship and Continental Championship Hopes |  |  |  | $1^{5}$ |

(1) For the World Mind Sports Games, the same rules hold as for the World Championship
(2) If already MF/MFF
(3) Plus, one gmi/gmif norm
(4) Plus, one $\mathrm{mi} / \mathrm{mif}$ norm
(5) Plus, one $\mathrm{mf} / \mathrm{mff}$ norm

## 4. Titles through norms

4.1. Results considered:

Results (or norms) acquired in international tournaments of the FMJD or those approved by the FMJD.

### 4.2. Reference competitions

The norms which are considered for titles acquired by the realization of norms in international competitions must have been fulfilled in a number of the following competitions:
a official competitions of the FMJD
b International tournament approved by the FMJD, following the recognition procedure in the internal regulations of the FMJD.
c team meetings between national federations which are considered to be approved international tournament when they respect the requested reference criteria.
Criteria for approving competitions for titles and norms
The data used to decide about approving international and the performances reached has to be clear and extensive. Approval of an International Tournament is done when the following criteria are met:
4.2.1. Two national federations have to be represented apart from the organising federation in such a way that at least one third of the participants are from another federation than the organising federation. An exception is made for the national championships which are also considered to be approved international tournament.
4.2.2. In a round robin tournament at least one third of the players plus 3 need to have a rating.
4.2.3. A player in a Swiss system tournament may be considered as playing in a round tournament with the sub-group of his opponents.
4.2.4. The tournament must have 7 rounds at least.
4.2.5. (not necessary for automatic norms see 4.7.1) The national championships played in the round robin form are approved if at least 3 players have a rating at the start of the competition. The national championships played with the Swiss system are approved if at least half of the players have a rating.
4.2.6. The tournament must be played following the international regulations for game and competition. The time schedule used has to be one of the official time schedules (see Annex 3, article 6.1). One game is played each day. However now and then 2 games per day are acceptable if these days are not consecutive.
4.2.7. The tournament should be registered and reported according the procedure described in Annex 9 p.1.3.
4.2.8. The tournament and the report will be approved for rating and titles by the Executive Council after advice by the rating director of the FMJD.
4.3. Categories of opponent groups

For each player in a tournament, Swiss system or round robin, the average rating of the group of his opponents is calculated.

All groups of opponents in a tournament are classified as indicated in the table below by the average rating Rm of the opponents. The average rating Rm is the sum of the ratings of the opponents ( 2100 for male and 2000 for female players without rating) divided by the number of opponents.

The average rating is rounded to the nearest whole number and the fraction 0.5 is rounded upwards to the nearest whole number.

In a competition where a player withdraws from the competition the category and the norms have to be adjusted. However, the games already played may be taken into account. The opponent group categories and the general table of required scores for the realisation of norms are presented below.
[table X-2] Categories of opponent groups depending on the average rating ( $\mathbf{R m}$ )

| Cat. | Average Rating (Rm) |  | Cat. | Average Rating (Rm) |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | open | female |  | open | female |
| I | ...- 1975 | ...- 1890 | XI | 2201-2225 | 2116-2140 |
| II | 1976-2000 | 1891-1915 | XII | 2226-2250 | 2141-2165 |
| III | 2001-2025 | 1916-1940 | XIII | 2251-2275 | 2166-2190 |
| IV | 2026-2050 | 1941-1965 | XIV | 2276-2300 | 2191-2215 |
| V | 2051-2075 | 1966-1990 | XV | 2301-2325 | 2216-2240 |
| VI | 2076-2100 | 1991-2015 | XVI | 2326-2350 | 2241-2265 |
| VII | 2101-2125 | 2016-2040 | XVII | 2351-2375 | 2266-2290 |
| VIII | 2126-2150 | 2041-2065 | XVIII | 2376-2400 | 2291-2315 |
| IX | 2151-2175 | 2066-2090 | XIX | 2401-... | 2316-... |
| X | 2176-2200 | 2091-2115 |  |  |  |

Required minimum same as at point 4.5

## Remarks:

## A: number of games

(1) $3 \mathrm{MF} / \mathrm{MFF}$
(2) $3 \mathrm{MI} / \mathrm{MIF}$ with 2250/2090
or 2 GMI with $2300 / 2165$
(3) 3 GMI/GMIF with $2300 / 2165$
(4) Number of players=number of opponents +1

RED norm: (5) Titleholders or classified with 2210(2110 for women)
(6) foreigners (*)
(7) players with rating
black norm: (8) foreigners (**)
(9) players with rating
$\left(^{*}\right) \quad$ foreigners: half of the players in a group for a red norm have to be foreign to the federation with the largest number of players in the group
$(* *)$ one third of the players in a group for a black norm have to be foreign to the federation with the largest number of players in the group
4.4. Criteria for black and red norms

The difference between a black norm and a red norm depends on the strength of the group of opponents a player has met in a tournament. It does not depend on the strength of the whole tournament. The result of a player in a Swiss tournament will be counted in the same way as if he had played a round robin tournament with his group of opponents. For the red norm the game rate should be at the level possible for $100 \%$ of the development factor (see Annex 9 p.1.2.2.1). For the black norms $60 \%$ of the development factor is also acceptable.
4.4.1. Red norms

A player can obtain a red norm when the group of his opponents, including himself realizes the following conditions:
4.4.1.2. At least half of the players need to have an international title or a rating of 2210 (2110 for women tournaments) or more, as shown in the minima given in the preceding table in relation with the number of participants.
4.4.1.3.

At least half of the players should have another nationality as the largest group of players in the tournament.
4.4.1.4. At least $80 \%$ of the players need to have a rating.
4.4.1.5. The tournament should be guided by (preferably) an International referee or by an FMJD referee.
4.4.2. (reserved)
4.4.3. Black norms

A player can obtain a black norm when the group of his opponents, including himself realizes the following conditions:
4.4.3.1. The tournament has at least seven rounds.
4.4.3.2. At least $1 / 3$ of the players should have another nationality as the largest group of players in the tournament.
4.4.3.4. At least $1 / 3$ of the players plus 3 need to have a rating.
4.5. Supplementary conditions for the calculation of results.
4.5.1 Competitions between teams of national federations:

The calculation is made in the same way as for a Swiss system tournament.
4.5.2. For a title norm a won game may be ignored when it has positive consequences for a player's norm. It is up to the player or his federation to ask for the application of this rule. The FMJD will not calculate all possible consequences.
4.5.3. GMI norms are valid in competitions where the player has met at least 3 GMI with rating 2300 or higher (GMIF with min. 2165+ for gmif).
4.5.4. MI norms are valid in competitions where the player has met at least 3 MI with rating 2250 or higher or has met 2 GMI with rating 2300 or higher (for mif title accordingly 3 mif/2090 2 gmif/2165).
4.5.5. For the titles MI and GMI at least one of the norms has to be a red norm.
4.5.6. (reserved)
4.5.7. MF norms are valid in competitions where the player has met at least 3 MF ( 3 mff for mff ).
4.5.8. For the titles in round robin tournaments the category and norms are calculated before the start of the tournament and announced by the referee. However, games not played and counted as regulatory results are not counted for the calculations of norms.
4.5.9. In all competitions $3 \mathrm{MF}(\mathrm{f})$ with rating 2210(2110) or more may be counted as $1 \mathrm{MI}(\mathrm{F})$ at 2250(2090) for the realisation of norms for $\mathrm{MI}(\mathrm{F})$ or $\mathrm{GMI}(\mathrm{F})$.
4.5.10. In all competitions $3 \mathrm{MI}(\mathrm{F})$ with rating $2250(2150)$ or more may be counted as 1 $\operatorname{GMI}(\mathrm{F})$ at $2300(2165)$ for the realisation of a $\mathrm{GMI}(\mathrm{F})$ norm.
4.5.11. $\quad \operatorname{CMF}(F)$ norms
4.5.11.1. Places 2-3 in a National Championship are counted as a $\mathrm{cMF}(\mathrm{F})$ norm
4.5.11.2. A place above 3 players with title $\operatorname{GMI}(\mathrm{F}) / \mathrm{MI}(\mathrm{F}) / \mathrm{MF}(\mathrm{F})$ in any continental/world championships (including youth and veterans) is counted as a norm

### 4.6. Application of norms \& attribution of titles

When a player has obtained the MF title by also realising MI or GMI norms he needs new norms for the title MI and GMI.

However, the already realised MI and GMI norms may be used for the MI or GMI title if the player realises new MF norms. The player may then exchange the already realised MI or GMI norm with the new MF norm in such a way that the MI or GMI norm may be counted for th MI or GMI title.

The same holds for the MI title obtained by one or more GMI norms.
Accordingly, for female titles.

### 4.7. Automatic Norms

A player can realise an automatic norm without realizing all conditions necessary for a norm by rating:
4.7.1. National Championships:

Every player who realises a score of $65 \%$ or more in a round robin national championship from 7 rounds or more realises an $\operatorname{MF}(f)$ norm. When the national championship is played by the Swiss system than only the champion will have an MF(f) norm if he realises a $65 \%$ score.

## 5. Title of International Grandmaster (GMI)

This title is awarded to player who realises 3 or more norms of GMI in approved international tournaments with at least 27 games in total. At least one of the norms has to be a RED norm. The candidate needs to have a rating of at least 2300 at the moment of realizing his last norm or in the future or in the past.

## 6. Title of International Master (MI)

This title is awarded to a player who realises 3 or more norms of MI or GMI in approved international tournaments with at least 25games in total. At least one of the norms has to be a RED norm the candidate needs to have a rating of at least 2250 at the moment of realizing his last norm or in the future or in the past

## 7. Title of FMJD Master (MF)

This title is awarded to all players who realise 3 or more norms of MF or MI or GMI in approved international tournaments with at least 20 games in total.

## 8. Title of candidate for FMJD Master (CMF)

This title is awarded to a player who realizes two norms of cMF or MF or MI or GMI

## 9. Women titles

The same regulations are valid for the titles International Grandmaster Women (GMIF), International Master Women (MIF), FMJD Master Women (MFF) and FMJD candidate for Master (cMFF) with rating values respectively: 2165 instead of 2300 and 2090 instead of 2250 .
10. (reserved)
11. (reserved)

## 12. Titles for the $\mathbf{6 4}$ section

The titles regarding the international game on the 64 board are awarded by using the same criteria and regulations as those demanded for the international game on the 100 board.

As a consequence, all tables in this Annex and all articles about the attribution of titles or the realisation of norms are equally applicable to the international game on the 64 board.

## 13. Tie Breaking

Tie breaking in any competition is done by article 5.11 of Annex 3, the official FMJD competition regulations. If a deciding match has to be played in any official FMJD competition the players obtain, before the tie-break, the same title belonging to their performance.

## 14. Insignias of the FMJD

A silver insignia of the FMJD may be awarded to an International Master on request of the national federation.

A golden insignia of the FMJD may be awarded to an International Grandmaster on request of the national federation.

The cost of making these insignia has to be paid in advance by the national federation to the treasurer of the FMJD.

## 15. Procedure

In the publications of the FMJD rating list FMJD publishes norms achieved by the players. A request for attribution of a title should be sent to the FMJD Council by the candidate via his national federation or by the national federation.

Every request consists of the complete name of the candidate, address, birth date and sufficient information to decide about the request for the candidate. The request has to contain a list of norms achieved by the candidate on which results the request for the title is based. The requests for an international title is examined and approved by the Council of FMJD and for confirmation presented to the General Assembly of the FMJD. The request is only considered after the corresponding fee has been paid to FMJD. If request will not be accepted, charge will not be refund.

# Annex 11 <br> FMJD recognition of special achievements and records 

## Preamble

The regulation concerns the recognition and ratification of:

- various special achievements in draughts
- records in each of these special achievements.

## 1. General aspects

The FMJD awards to players, having been proposed by their respective federations, diplomas of recognition of a special achievement or a record.

The proposal must be sent to the office with validating documents.
Diplomas must be ratified at a General Assembly.

## 2. Events Considered

The following events may be considered if they have been accomplished in the presence of two members of the board of the national federation have to be present.

1. Normal simultaneous games
2. Blindfold Simultaneous games
3. Clock Simultaneous games
4. Edraughts clock simultaneous games
(List to be completed following future suggestions and adaptations)

## 2a. Procedure for asking recognition for a coming event

Attempts to improve a World Records should be submitted by a national federation for approval by the FMJD in a period of three to six months before the attempt will take place. During the approval process the FMJD will not accept other proposals for the same World Record.

Only national federations can submit proposals for a World Record attempt to the FMJD. World Records may not be attacked earlier than six months after they are established.

## 3. Definition of events

See annex 8 for the full definitions of these events.

1. A simultaneous match consists of one player called the 'expert' who plays a certain number of games with several opponents all at the same time. The expert circulates from one board to the next for each move, always in the same direction he has chosen from the start. The expert imposes therefore himself his tempo.
2. A clock simultaneous match consists of one player called the 'expert' who plays a certain number of games with several opponents all at the same time. The expert circulates from one board to another board of his own choice, depending on where he wants to play a move. The rate of play for the games, both for the expert and his opponents, is 50 moves for the first two hours and 25 moves per subsequent hour.
3. A blindfold simultaneous match consists of one player called the 'expert' who plays a certain number of games without seeing any board with several opponents all at the same time. An intermediate circulates from one board to the next for each move, communicated to him by the expert, always in the same direction he has chosen from the start. The expert imposes therefore himself his tempo.
4. An edraughts clock simultaneous match consists of one player called the 'expert' who plays a certain number of games with several opponents all at the same time. The expert makes his moves on a computer on a board where he wants to play a move.

The expert may select the next board on which he wants to play choosing between several methods offered by the software. The rate of play for the games, both for the expert and his opponents, is 50 moves for the first two hours and 25 moves per subsequent hour.

## 4. Criteria for the achievement

4.1. For a normal simultaneous event
4.1.1. The number of opponents must be at least 100 .
4.1.2 The expert must have scored at least $80 \%$ of the possible points;
4.1.3. At least $70 \%$ of the opponents must be members of a national federation.
4.1.4. The time duration of the event must be stated.
4.2. For a blindfold simultaneous event.
4.2.1. The number of opponents must be at least 10 ;
4.2.2. The expert must have scored at least $70 \%$ of the possible points;
4.2.3. At least $90 \%$ of the opponents must have a national or international rating;
4.2.4. A maximum of $10 \%$ of the opponents may be a member of the club from which the expert is a member
4.2.5. The average rating of the opponents must be at least 1950. For this rating the following conditions hold:

- If players only have a national rating then this national rating may be used if the national rating is known to be somehow comparable to the FMJD rating. For those national ratings for which there is an official FMJD formula to calculate the FMJD rating from the national rating this official FMJD formula has to be used.
- Players without any rating are supposed to have the same rating as the weakest player with a rating.
4.2.6. The time duration of the event must be stated.
4.3. For a clock simultaneous event.
4.3.1. The number of opponents must be at least 25 ;
4.3.2. The expert must have scored at least $70 \%$ of the possible points;
4.3.3. At least $90 \%$ of the opponents must have a national or international rating;
4.3.4. A maximum of $10 \%$ of the opponents may be a member of the club from which the expert is a member
4.3.5. The average rating of the opponents must be at least 1950. For this rating the following conditions hold:
- If players only have a national rating then this national rating may be used if the national rating is known to be somehow comparable to the FMJD rating. For those national ratings for which there is an official FMJD formula to calculate the FMJD rating from the national rating this official FMJD formula has to be used.
- Players without any rating are supposed to have the same rating as the weakest player with a rating.
4.3.6. The time duration of the event must be stated.
4.4. For an edraughts clock simultaneous event.
4.4.1. The number of opponents must be at least 25
4.4.2. The expert must have scored at least $70 \%$ of the possible points;
4.4.3. At least $90 \%$ of the opponents must have a national or international rating;
4.4.4. A maximum of $10 \%$ of the opponents may be a member of the club from which the expert is a member
4.4.5. The average rating of the opponents must be at least 1950. For this rating the following conditions hold:
- If players only have a national rating then this national rating may be used if the national rating is known to be somehow comparable to the FMJD rating. For those national ratings for which there is an official FMJD formula to calculate the FMJD rating from the national rating this official FMJD formula has to be used.
- Players without any rating are supposed to have the same rating as the weakest player with a rating.
4.4.6. Only software that has been approved by the FMJD Technical Committee is allowed to be used in official events.
4.4.7. If the event is played with opponents at several venues at least one referee for each venue is needed.
4.4.8. The time duration of the event must be stated.

## 5. Record

For all world records: an improvement of a World Record consists of an improvement of the criteria 1 and 2 in that order, so a higher number of opponents or a higher score with the same number of opponents.

## 6. Special prizes for games.

This type of prize is awarded for games or parts of games in any competition. There are four distinct categories.
a. The most interesting game.
b. The best new idea in the opening phase of a game.
c. The most beautiful endgame.
d. The most beautiful combination.

In each category the prize is awarded by a committee of five IM or IGM, proposed by the respective federations and authorized by the Executive Committee. The games or parts of games are sent to the FMJD office at the end of the year. The office then presents them to the Committee of five, taking care to preserve the anonymity of senders and candidates.

## 7. Validity

Annex 11 - FMJD recognition of special achievements and records

Achievements are taken into consideration subject to the following conditions.

- the player must be a member of a national federation;
- the national federation has to affiliated to the FMJD without financial debt to the FMJD.

## 8. Application of this regulation

After ratification by the General Assembly, this regulation will come into force retroactively, from the year 1972 onwards (a date fixed by the General Assembly) without annulment of any recognition given earlier.

# Annex 12 <br> Individual FMJD Competitions - The Women's World Championship 

## 1. Eligibility

The Women's World Championship is restricted to women members of national federations affiliated to the FMJD.

## 2. Frequency and schedule

This championship is held every two years, in the odd years. It is organised by a national federation, under the auspices of the FMJD.

The World Championship and World Title match are held following the schedule:

- Odd Year World Championship of 20 players
- Even Year World Title Match

## 3. General regulations

The general regulations in Annex 2 for official FMJD competitions are applicable to this World Championship.

## 4. Qualification

The following women may participate, always respecting article 1 .
The composition of the participants list will be decided by a preceding General Assembly. Amongst others, a choice can be made from the following candidates
a. The current woman world champion and challenger;
b. One player extra "organisation place" for the organising federation
c. One player extra "sponsor place"
d. Players selected from continental qualification tournaments. The division of players over the continents is decided at the preceding General Assembly. For the players selected from the continental qualification tournaments a maximum number of players from one federation is set, usually 1 player maximum.
e. Possibly direct places for some of the strongest federations as may be seen from the FMJD country rating list for women in the official FMJD publication at January 1 of the year before the year of the World Championship.

## f. Players from the World Cup classification

g. For the most recent qualification system see the appendix at the end of this annex. The appendix will be updated if necessary, after each General Assembly.

## 5. Conditions

The organising federation and all participating federations must have paid the membership fees of the FMJD for the last two years.

The participants pay a participation fee described in the financial regulations in the Internal Regulations of the FMJD.

## 6. Regulations for qualifying tournaments

The regulations for the qualifying tournaments, continental championships or other continental qualification tournaments have to be agreed with the FMJD before the start of the tournament.

## 7. Reserves for the World Championship

For each World Championship the Executive Council of the FMJD sets a date, typically some weeks until one month before the event. If a qualified player informs the FMJD that she cannot participate before this date she is replaced by a player from the tournament from which she was qualified, or from the federation which qualified him in the case of a direct place, organisation or sponsor place. If she informs the FMJD after this date, then the global reserve list will be used. Composition of Global Reserve list is defined at Appendix C of Annex 17.

## 8. Schedule of the competition

The women's championship is held in the form of a round robin tournament. The drawing of lots must be arranged so that players from the same federation meet each other in the first half of the competition.

## 9. Awarding the Title and Tie Breaking

The participant having the largest number of points at the end of the competition is awarded the title of Woman World Champion.
The order in the final classification for players with the same score is decided by the application of the following variant of article 5.11.1.2.1 of Annex 3 Official FMJD competition regulations:

1. the largest number of victories
2. the best results between the tied players
3. the best results obtained in order of the classification

If all criteria for tie breaking mentioned above are equal for the first place or for a place with the right for challenging, a decision must be reached by the use of Superblitz tie break(s), see Annex 2.

## 10. Right for the World Title Match

1. 1.If the ex-champion has lost her title in the tournament for the World Championship, she has the right to challenge the new champion to a World Title Match. If the exchampion has retained her title in the World Championship tournament, the player ended on the second place in the World Championship has the right to challenge the current World Champion to a World Title Match.
2. When a world title match cannot be played the World Champion keeps her title but does not have the right for a title match two years later. Then this right for a title match goes to the numbers 1 and 2 of the next World Championship tournament.
3. When the conditions for the world title match are acceptable for the FMJD Executive Council the players have the obligation to play (unless they come with a better possibility). If a player does not accept the conditions, she loses her automatic qualification to the next World Championship. The next player medal winner of the last World Championship takes her place, but not below the level of the bronze medallist of the last World Championship.
4. If no two players accept the conditions, the World Title match is to be announced as cancelled and the current World Champion retains her title.

## 11. The World Title Match for women

The World Title match must take place in the even years following the tournament. The match must be played under the auspices of the FMJD, and the duty of organising it must be awarded to the national federation which offers the best financial conditions and the best guarantees, within the established time limit. If there is no offer, the Executive Council of the FMJD will award the duty of organising the match to the national federation offering the best facilities, both for the players and for the general promotion of the game. If there is no offer to organise the match with acceptable financial conditions the World Champion retains her title.

The match is played with the following system.

1. The match consists of 9 rounds:
1.1. 1st game $\rightarrow$ standard game. 1 hour and 30 minutes for the first 45 moves, followed by 30 minutes for the rest of the game with an addition of 30 seconds starting from the 46th move.

If nor draw, then the result of the round if 12:0 for the winner. Round is completed.
1.2. Next game (if needed) is a rapid game $20^{\prime}+5$ " per move.

If nor draw, then the result of the round if $8: 4$ for the winner and round is completed.
1.3. Next game (if needed) is a blitz game $5^{\prime}+3$ " per move.

If nor draw, then the result of the round if 7:5 for the winner and round is completed.
1.4. After draw in blitz game round is completed and the results of the round is $6: 6$.
2. Win

The player who gets more points wins the match.
In case of equality the following criteria will be applied in the following order:
2.1. better score in standard games
2.2. better score in rapid games
2.3. deciding tie-break
3. Deciding tie-break

Deciding tiebreak will be played on the next day. The tiebreak consists of unlimited number of games until first victory. First four games will be played as a rapid game $\left(20^{\prime}+5^{\prime \prime}\right)$, since game number 5 th blitz games $\left(5^{\prime}+3^{\prime \prime}\right)$ will be played until the end.

## 12. Prizes

The FMJD awards an official diploma and a medal to the champion.

## 13. General issues

All FMJD regulations and procedures must be observed at all times.

## 14. Exceptional cases

All exceptional cases must be dealt with by the Executive Council.

## Appendix A. most recent qualification system for World Championship Women

1. (1) World Champion
2. (2) Opponent form the title match and one player in order of the final classification of the previous World Championship or, if the title match was not played, 2 players in order of the final classification of the previous World Championship.
A player who refuses to play the match cannot be promoted from points 1 and 2 . This place will go to the global reserve list.
3. (2) Organization place / Sponsor place
4. (2) Africa
5. (2) Pan America
6. (4) Asia
7. (7) Europe

## Additional conditions:

- Federations are divided into two groups:

Group A - federations which organised and reported to FMJD for rating their national championship for two successive years before the year of World Championship

Group B - the rest of FMJD member federations

- Places $(1,2,3)$ are out of any federation limit
- Continental places 4,5,6 and 7: Maximum 2 from the same federation for federations in group A and maximum one player for federations in group B. Places are an internal confederation decision, the names of the players should be delivered to the FMJD not later than on January 1st, of the year of World Championship.
- $\quad$ Reserve places are created according to the proposal "Global reserve list" (Annex 17 Appendix C) without any federation limit.

## Option 24

If the Organiser offers good condition, Executive Council may change the system by raising up number of participants up to 24 . All qualifications rights above conditions above are saved. Not more than half extra places should be given to the organisers. The rest should be distributed to the federations with own National Championship for Women not represented then Global Reserve List.

## Annex 13 <br> The World Championship Youth

## 1. Eligibility

The world championships youth are open for members of national federations affiliated with the FMJD, without any distinction to age or sex.

## 2. Frequency and schedule

These championships are held every year. They are organized by FMJD or a national federation, under the auspices of the FMJD.

Whole tournament takes 8 playing days starting from last Friday of October.

## 3. General issues

3.1. All FMJD regulations and procedures must be observed at all times.
3.2. The general regulations in Annex 2 for official FMJD competitions are applicable to these world championships.

## 4. Categories

4.1. The world championships youth are played in separate groups for boys and girls and in the following age categories:

- Juniors : maximum age at December 31st of the year of the competition is 19 years;
-Cadets: maximum age at December 31st of the year of the competition is 16 years;
-Mini Cadets: maximum age at December 31st of the year of the competition is 13 years;
-Hopes: maximum age at December 31st of the year of the competition is 10 years; - Young Stars: maximum age at December 31st of the year of the competition is 8 years. Formally the groups for boys are open (girls can play there).
4.2. The Word championships youth blitz and rapid.

During the world championships also the world championships blitz and rapid for all youth categories is organized.

## 5. Participants

5.1. All participating federations must be fully paid up members of the FMJD. However, in special cases the FMJD tournament director youth (TDY) may also accept youth players from federations who are not fully paid up members of FMJD.
5.2. All federations can send 3 players in each group category.
5.3. In each group organizing federation pays the hotel costs for each 3rd player from the same federation. It means - if 1 or 2 players in the group from the country - all must pay; if 3 players in the group from the country - one place is for free. If federation did not get free places on the condition above - then one player from whole delegation will be for free from organizers. It means - at least one competitor from each federation will receive a free hotel.
5.4. The federation which organizes the competition can subscribe a fourth player in each group as an organization place.
5.5. For each group a sponsor places can be used. These places are not counted for the limits defined above. Sponsor places are subject of organizer decision.
5.6. The participation of world championship blitz and rapid is open for all youth players; there is no limit to the number of players from one federation.

## 6. Applications and its validity

6.1. Applications must be sent from National Federations. One person who will be present during the event, must be nominated in this application as a Chief of delegation.
6.2. The deadline for application (if not defined otherwise in Rules \& Regulations) is one month prior to the date of the opening of the event.

## 7. Basic conditions

### 7.1. Federations

7.1.1. Must pay (before deadline) competition fee (defined in FMJD internal regulations).
7.2.2. Must pay (before deadline defined by the organiser) hotel costs (accommodation and meals).

### 7.2. Organizer

7.2.1. Pays hotel/meals:
a.for the players (see point 5 -minimum one from each federation or each 3 rd in each group).
b. for the chief referee and for the FMJD tournament director youth (TDY) or other responsible person from FMJD.
7.2.2. Solo responsible for all organization costs like materials, playing rooms, opening and closing ceremony and any other related.
7.2.3. Solo responsible for the transport from/to playing venue if hotel is not at the same place.
7.2.4. Pays all costs connected with referee staff (including per diems, excluding chief referee travel costs)
7.3. Opening and closing ceremony
7.3.1. Anthems
a.FMJD anthem must be played always as a first during opening ceremony and just after official closing.
b. National anthem of host country must be played during the opening.
c.National anthems must be played while top 3 players are on the podium.

### 7.3.2. Awards

a.Organizer is responsible for:

- cups for top 3 players in each category (main, rapid, blitz);
- diplomas for each player in main tournament.
b. FMJD is responsible for:
- medals for top 3 players in each category (main, rapid, blitz);
- official diplomas for top 3 players in each category (main, rapid, blitz).

### 7.4. Exceptional cases

All exceptional cases must be dealt with by the Executive Council.

## 8. National team classification.

The national team classification is based on individual results of players representing their national federation.

The best 3 players from one country in the final classification obtain points in each age group, the calculation is done by percentage score + bonus points for top 10 places (bonus points exactly like in World Cup: $1^{\text {st }}-100,2^{\text {nd }}-70, \ldots, 10^{\text {th }}-20$ ). Example -6 points out of 9 rounds and 21st place gives 33 points for the country. 1st place with 15 points gives 183 points $(100+83)$.

There will be separate classifications in classic, blitz and rapid championships, in each classification results of boys and girls groups will be counted together.

## 9. Technical details

9.1. The world championships are held in the form of a 9 rounds Swiss (on truncated Solkoff) system tournament. In specific cases FMJD tournament director youth (TDY) can change the system.
9.2. If no other information in championships Rules \& Regulations the default games rate are:
9.2.1. World championships Juniors and Cadets - 1 hour and 30 minutes for the first 45 moves, followed by 30 minutes for the rest of the game with an addition of 30 seconds starting from the 46th move.
9.2.2. World championships Mini Cadets - Fischer system with 1 hour and 20 minutes +1 minute for each move.
9.2.3. World championships Hopes and Young Stars - Fischer system with 1 hour +30 seconds for each move.

## 10. The bidding procedure

10.1. Applications for the world championships must be delivered to the FMJD by the end of June the year prior to the Championship.
10.2. The application must contain:
a.declaration of acknowledge and acceptation of this Annex and all other regulations related.
b. Completed information about venue proposed.
c.Name of the Tournament Director.
d. Declaration of acknowledge that the Federation are solo responsible of any guaranties connected with the championships.
10.3. FMJD tournament director youth (TDY) can ask for personal visit in the venue offered.

All costs connected with it (TDY's trip and all local costs) must be covered by the applicant.
10.4. The final decision will be taken by FMJD EC before the end of August.
10.5. In a special situations, the schedule set out in this point may be changed.

# Annex 17 <br> Individual FMJD Competitions - The World Championship (all categories) 

## 1. Eligibility

The World Championship is restricted to members of national federations affiliated with the FMJD, without any distinction to age or sex.

## 2. Frequency and schedule

This championship is held every two years, in the odd years. It is organised by a national federation, under the auspices of the FMJD.

The World Championship and World Title match are held following the schedule:

- Odd year World Championship of 20 players
- Even year World Title Match
- Next odd year Large World Championship with 40 players
- $\quad$ Next even year world Title Match

## 3. General regulations

The general regulations in Annex 2 for official FMJD competitions are applicable to this World Championship.

## 4. Qualification

The following players may participate, always respecting article 1.
The composition of the participants list will be decided by a preceding General Assembly. Amongst others, a choice can be made from the following candidates
a. The current world champion and challenger.
b. One or more extra players qualified from the previous World Championship, to be decided by the General Assembly. In principle for a World Championship of 20 players one extra player from the previous World Championship will qualify and for a World Championship of 40 players 3 extra players from the previous World Championship.
c. One player extra "organisation place" for the organising federation
d. One player extra "sponsor place"
e. Players selected from continental qualification tournaments. The division of players over the continents is decided at the preceding General Assembly. For the players selected from the continental qualification tournaments a maximum number of players from one federation is set. This number may be higher for a federation that organises its national championship and reports it to the FMJD than for a federation that does not.
f. Possibly directs places for some of the strongest federations as may be seen from the FMJD federation rating list in the official FMJD publication at January 1 of the year before the year of the World Championship.
g. Players from the World Cup classification
h. Possibly some places from a Challenger tournament for players of all continents.
i. Possibly an FMJD wild card
j. For the most recent qualification system see the appendix at the end of this annex. The appendix will be updated if necessary, after each General Assembly.

## 5. Conditions

The organising federation and all participating federations must be fully paid up members of the FMJD.
The participants pay a participation fee described in the financial regulations in the Internal Regulations of the FMJD.

## 6. Regulations for qualifying tournaments

The regulations for the qualifying tournaments, continental championships or other continental qualification tournaments have to be agreed with the FMJD before the start of the tournament.

## 7. Reserves for the World Championship

For each World Championship the Executive Council of the FMJD sets a date, typically some weeks until one month before the event.

If a qualified player informs the FMJD that he cannot participate before this date he is replaced by a player from the tournament from which he was qualified, or from the federation which qualified him in the case of a direct place, organisation or sponsor place. If he informs the FMJD after this date then the global reserve list will be used. Composition of Global Reserve list is defined at Appendix C of this Annex.

## 8. Schedule of the competition

The World Championship of 20 players is held in the form of a round robin tournament. The World Championship of 40 players is held with semi-finals and finals, both in the form of a round robin tournament. The drawing of lots must be arranged so that players from the same federation meet each other in the first half of the competition.

## 8a. Time schedule for the games

The games in the championship will be played with the time schedule of 1 hour and 30 minutes for the first 45 moves, followed by 30 minutes for the rest of the game with an addition of 30 seconds starting from the 46th move.

## 10. Awarding the Title and Tie Breaking

The participant having the largest number of points at the end of the competition is awarded the title of World Champion.
The order in the final classification for players with the same score is decided by the application of the following variant of article 5.11.1.2.1 of Annex 3 Official FMJD competition regulations:

1. the largest number of victories
2. the best results between the tied players
3. the best results obtained in order of the classification

In comparing the results between the players, a plus draw is better than a normal draw which is better than a minus draw.
If all criteria for tie breaking mentioned above are equal for the first place or for a place with the right for challenging, a decision must be reached by the use of Superblitz tie break(s), see Annex 2.

## 11. Right for the World Title Match

1. If the ex-champion has lost his title in the tournament for the World Championship, he has the right to challenge the new champion to a World Title Match. If the exchampion has retained his title in the World Championship tournament, the player ended on the second place in the World Championship has the right to challenge the current World Champion to a World Title Match.
2. When a world title match cannot be played the World Champion keeps his title but does not have the right for a title match two years later. Then this right for a title match goes to the numbers 1 and 2 of the next World Championship tournament.
3. When the conditions for the world title match are acceptable for the FMJD Executive Council the players have the obligation to play (unless they come with a better possibility). If a player does not accept the conditions, he loses his automatic qualification to the next World Championship. The next player medal winner of the last World Championship takes his place, but not below the level of the bronze medallist of the last World Championship.
4. If no two players accept the conditions, the World Title match is to be announced as cancelled and the current World Champion retains his title.

## 12. The World Title Match

The World Title match must take place in the even year following the tournament. The match must be played under the auspices of the FMJD, and the duty of organising it must be awarded to the national federation which offers the best financial conditions and the best guarantees, within the established time limit. If there is no offer, the Executive Council of the FMJD will award the duty of organising the match to the national federation offering the best facilities, both for the players and for the general promotion of the game.
If there is no offer to organise the match with acceptable financial conditions the World Champion retains his title.

The match is played with the following system.
(a) 12 regular games
(b) After 12 games the player who has the highest score wins the match if he has won at least 3 games.
(c) If not, the match continues until one of the players reaches a third victory in total:
i. 3 rapid games 20 minutes plus 10 seconds Fischer system
ii . 3 blitz games with a time schedule of 10 minutes and 5 seconds Fischer system
iii. Superblitz tie breaks with a time schedule of 10 minutes and 2 seconds per move Fischer system.

Annex 17 - Individual FMJD Competitions - The World Championship (all categories)

Important remark: the FMJD Tournament Director has the right to organize the World Title match in another way in cooperation with the two players and the organizing federation only if both players agree with it.

## 13. Prizes

The FMJD awards an official diploma and a medal to the champion.

## 14. General issues

All FMJD regulations and procedures must be observed at all times.

## 15. Exceptional cases

All exceptional cases must be dealt with by the Executive Council.

## Appendix A <br> most recent qualification system for a World Championship of $\mathbf{2 0}$ players

Qualification rules for the World Championship all categories 2023 are the following:

1. (1) World Champion
2. (2) Opponent form the title match and one player in order of the final classification of the previous World Championship or, if the title match was not played, 2 players in order of the final classification of the previous World Championship.
A player who refuses to play the match cannot be promoted from points 1 and 2. This place will go to the global reserve list.
3. (2) Organization place / Sponsor place
4. (4) Africa
5. (2) Pan America
6. (2) Asia
7. (5) Europe
8. (1) Rating leader of the year of World Championship. If this player is already qualified, then this place goes to World Cup (see point 9).
9. (1) Best player from the World Cup classification of the year prior to World Championship not yet qualified.
Additional conditions:

- Federations are divided into two groups:

Group A - federations which organised and reported to FMJD for rating their national championship 2021 and 2022

Group B - the rest of FMJD member federations

- Places ( $1,2,3$ and 8 ) are out of any federation limit
- Continental places 4,5,6 and 7: Maximum 2 from the same federation for federations in group A and maximum one player for federations in group B. Places are an internal confederation decision, the names of the players should be delivered to the FMJD not later than on January 1st, 2023.
Places from World Cup ( 9 and possibly 8). For federations in group A - without any limits. For federations in group B - maximum one from the federation including also possible continental places.
- $\quad$ Reserve places are created according to the proposal "Global reserve list" (Annex 17 Appendix C) without any federation limit.

## Appendix B <br> most recent qualification system for a World Championship of 40 players:

Qualification rules for the World Championship all categories of 40 players are the following:

1. (1) World Champion
2. (4) Opponent from the title match and 3 players in order of the final classification of the previous World Championship or, if the title match was not played, 4 players in order of the final classification of the previous World Championship.
A player who refuses to play the match cannot be promoted from points 1 and 2. This place will go to the global reserve list.
3. (2) Organization place / Sponsor place
4. (6) Africa
5. (4) America
6. (4) Asia
7. (14) Europe
8. (3) Rating leaders (numbers 1, 2 and 3) Jan 1st, of the year of World Championship. If these players are already qualified, then this place goes to World Cup (see point 9).
9. (2) Best 2 players from the World Cup of the year prior to World Championship classification not yet qualified.
Additional conditions:

- Federations are divided into two groups:

Group A - federations which organised and reported to FMJD for rating their national championship for two successive years before the year of World Championship
Group B - the rest of FMJD member federations

- Places ( $1,2,3$ and 8 ) are out of any federation limit
- Continental places 4,5,6 and 7: Maximum 2 from the same federation for federations in group A and maximum one player for federations in group B. Places are an internal confederation decision, the names of the players should be delivered to the FMJD no later than on January $1^{\text {st }}$, of the year of World Championship.
Places from World Cup (9 and possibly 8). For federations in group A - without any limits. For federations in group B - maximum one from the federation including also possible continental places.
- Reserve places are created according to the "Global reserve list" (Annex 17 - Appendix C) without any federation limit.

Annex 17 - Individual FMJD Competitions - The World Championship (all categories)
Option 48
If the Organiser offers good condition, Executive Council may change the system by raising up number of participants to 48 . All conditions above are saved. Minimum four of this extra places must be given to Global Reserve List. With 48 players Appendix B1 will be changes accordingly to 4 groups of 12 players and final with 12 or 16 players.

## Appendix B1 <br> Format of the World Championship of $\mathbf{4 0}$ players

## The system:

Semi-finals as a round robin (4 groups of 10 players) - 9 rounds (6-9 days)
Final with 12 , games played in semi are included -9 rounds (6-9 days)

## Technical details

## 1 Semi-finals

1.1 All 40 players will be divided into 4 round-robin semi-final tournaments.
1.2 Composition of the groups.

The players will be divided into the groups in order of ratings with the rule, that players from one country (if less than 5) cannot be in the same group. If the participants list will be changed, the rating list of participants will be re-ordered.
Group $\mathrm{A} \rightarrow 1,8,9,16,17,24,25,32,33,40$
Group B $\rightarrow 2,7,10,15,18,23,26,31,34,39$
Group C $\rightarrow 3,6,11,14,19,22,27,30,35,38$
Group D $\rightarrow 4,5,12,13,20,21,28,29,36,37$
1.3 The best 3 players from each semi-final go to the final tournament.

## 2 Final tournament

2.1 The final tournament will be played as round-robin tournament with 12 players.

Semi-final games between qualified players from the same group are counted for the final.
2.2 Drawing will be done just after the last round in the semi-finals. The following rules will be used:
2.2.a players from group A get the numbers from 1 to 3
2.2.b players from group B get the numbers from 4 to 6
2.2.c players from group $C$ get the numbers from 7 to 9
2.2.d players from group $D$ get the numbers from 10 to 12
2.3 Numbers for the players from the same country:
2.3.a If 6 players from the same country $\rightarrow 1,4,7,10,2,5$ (numbers for groups should be changed accordingly)
2.3.b If 5 players from the same country $\rightarrow 1,4,7,10,2$ (numbers for groups should be changed accordingly)

Annex 17 - Individual FMJD Competitions - The World Championship (all categories)
2.3.c If 4 or less players from the same country, all should receive number from one of the pools:
A. $1,4,7,10$
B. $2,5,8,11$
C. $3,6,9,12$
2.4 Paring:

| round I | $1-4$ | $2-5$ | $3-6$ | $10-7$ | $11-8$ | $12-9$ |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| round II | $7-1$ | $8-2$ | $9-3$ | $4-10$ | $5-11$ | $6-12$ |
| round III | $1-10$ | $2-11$ | $3-12$ | $7-4$ | $8-5$ | $9-6$ |
| round IV | $5-1$ | $6-2$ | $4-3$ | $11-7$ | $12-8$ | $10-9$ |
| round V | $1-6$ | $2-4$ | $3-5$ | $7-12$ | $8-10$ | $9-11$ |
| round VI | $9-1$ | $7-2$ | $8-3$ | $12-4$ | $10-5$ | $11-6$ |
| round VII | $1-12$ | $2-10$ | $3-11$ | $4-9$ | $5-7$ | $6-8$ |
| round VIII | $8-1$ | $9-2$ | $7-3$ | $11-4$ | $12-5$ | $10-6$ |
| round IX | $1-11$ | $2-12$ | $3-10$ | $4-8$ | $5-9$ | $6-7$ |

## Appendix C Definition of Global Reserve list

Global reserve list:

1. Highest ranked player not yet qualified in FMJD World Cup classification.
2. Highest ranked player not yet qualified in FMJD Rating list.
3. Second highest ranked player not yet qualified in FMJD World Cup classification.
4. Second highest ranked player not yet qualified in FMJD Rating list.
5. Third highest ranked player not yet qualified in FMJD World Cup classification.
6. Third highest ranked player not yet qualified in FMJD Rating list.
7. etc ...

Remarks:

1. The rating list for this purpose will be renumbered after deleting those players that played less than 50 rating games in the previous 3 years.
2. The global reserve list is without any federation limit.
3. The names of the players on the global reserve list will be announced immediately after publication of the FMJD World Rating and FMJD World Cup classification on January 1st of the year in which the World Championship will be played.
4. Global reserve lists are separate for World Championship Men (Open) and World Championship Women. The World Cup classification and the Rating list open/women are considering accordingly.

## Annex 18 <br> FMJD World Cup system

Every player participating in an event included into the World Cup system gets World Cup points (WCP). There is a two-separate world cup classification: man(open) and women.

Women are calculated (by default) only for women's classification. Women can also be counted in World Cup Open, but it must be clearly declared before her first tournament of the year and it excludes her from women's classification.

Every player receives as world cup points the points scored in the tournament and the first 10 players receive extra bonus points.

## Stars

The number of stars, the competition factor, for the event depends on the total prize money for the event: 3 stars $-6000 €, 5-10000 €, 7$ stars $-20000 €, 9$ stars $-30000 €$.

Details of prizes are at Appendix A.

## Getting World Cup points

$$
\text { WCP = bonus }+ \text { factor*TP }
$$

where:
TP - point scored in the tournament (not more than 2 per each game)
Bonus - bonus points for best 10 players, from place \#1 to 10 :

$$
100,70,50,40,35,30,26,24,22,20
$$

Factor - depends on competition status.
One-star event - factor $=1$, three stars events - factor $=3$, five stars event factor $=5$, seven stars even factor $=10$

## Classification

World Cup score it is the best 4 results from the previous 24 months (day of last round decides).
Criteria:

1. sum of World Cup points
2. number of 1 st places
3. number of 2 nd places
4. number of 3rd places
5. better result in last tournament
6. number of winning games

## The winners

After last World Cup event each year, the standing on December 31st will be calculated and FMJD will announce and award winners of World Cup (open/women) and.

## Conditions for world cup events

1. Standard FMJD Swiss (on Solkoff). This means the following order of tie braking decisions:
a. Short Solkoff truncated
b. Solkoff plus
c. Solkoff Baliakin
d. Full Solkoff truncated
2. FMJD-Draughts Arbiter Pro (DAP) software for paring.
3. System depend on number of players:
a. 18 or more -9 or 10 rounds Swiss FMJD Solkoff truncated
b. 11-18-7 rounds Swiss FMJD Solkoff truncated
c. 7-10 - round-robin
d. $<7$ - double round robin
4. Organiser of each tournament has a choice:
a. Separate tournament for women and separates for man.
b. One group and the following conditions:
i. women can win also prizes in open category (instead of this for women);
ii. women are omitted when counting bonus point for World Cup (instead this who declared wish to be classify only in open category).
This choice must be clearly declared in rules \& regulations of the event since first time event has been announced.
5. For the events with minimum 5* other systems are possible, if agreed with FMJD and announced 6 months in advance.
6. Chief referee with FMJD title FR or IR (FMJD referee or International referee) nominated by organizers.
7. Results must be delivered to FMJD round by round using DAP.
8. On web page of the event and at the playing hall the FMJD logo must be presented.
9. Organizer can use additionally or solo name "FMJD World Cup" as a brand of his event.
10. Going down with the level of World Cup (less stars) is impossible
11. Going up with the level of World Cup is possible not late than 3 months before the event.
12. Hotel and meals offered for the players, cannot be higher as normal prices in the same place.
13. Tournament fee cannot be higher than 60 euro. GMI with rating minimum 2300 and GMIF with rating minimum 2165 are free of competition fee.
14. Competitions fee can be doubled, if players do not use official hotel (if defined).
15. Organizers are obligated to support players with documents necessary for visa. This should be done not late then 7 days after request.
16. FMJD is not responsible for organizers duties as well as consequence of cancelling event.
17. Prize money can be paid in cash or bank transfer. If by bank transfer, then not late then 7 days after receiving all necessary data.
18. Organizers are solely responsible for financial obligations.
19. Specific rules and regulation for the event must be delivered to FMJD no later than 4 months prior to the event for the final approval.

## Appendix A Prize money for World Cup

Prize money (net of any local tax.)

|  | $3^{*}$ |  | $5^{*}$ |  | $7^{*}$ |  | $9^{*}$ |  |
| :---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
|  | open | women | open | women | open | women | open | women |
| I | $1200 €$ | $600 €$ | $2000 €$ | $1000 €$ | $3000 €$ | $1400 €$ | $6000 €$ | $2500 €$ |
| II | $900 €$ | $400 €$ | $1400 €$ | $700 €$ | $2400 €$ | $1100 €$ | $4000 €$ | $2000 €$ |
| III | $800 €$ | $300 €$ | $1000 €$ | $500 €$ | $2000 €$ | $800 €$ | $2500 €$ | $1500 €$ |
| IV | $600 €$ |  | $700 €$ | $300 €$ | $1500 €$ | $700 €$ | $1500 €$ | $1000 €$ |
| V | $450 €$ |  | $600 €$ | $200 €$ | $1300 €$ | $550 €$ | $1100 €$ | $800 €$ |
| VI | $350 €$ |  | $500 €$ | $100 €$ | $1000 €$ | $450 €$ | $1000 €$ | $700 €$ |
| VII | $250 €$ |  | $400 €$ |  | $800 €$ | $350 €$ | $900 €$ | $550 €$ |
| VIII | $150 €$ |  | $300 €$ |  | $700 €$ | $350 €$ | $800 €$ | $400 €$ |
| IX |  |  | $200 €$ |  | $600 €$ | $250 €$ | $700 €$ | $300 €$ |
| X |  |  | $100 €$ |  | $500 €$ | $250 €$ | $600 €$ | $250 €$ |
| XI |  |  |  |  |  |  | $500 €$ |  |
| XII |  |  |  |  |  |  | $400 €$ |  |

Each organiser is free to give more prizes. The table above shows required minima.

## Code of behaviour for official tournaments to follow by all parties

## Code of behaviour to follow by all parties

1. Opening and closing ceremonies are the integral part of the event and each player must be present as well as the chief referee.
2. Attending the ceremonies means staying from the beginning to the end.
3. During opening the FMJD anthem must be played. For the closing ceremony - FMJD anthem must close the event.
4. Ceremonies should be held on the same day as the first and the last round. In exceptional circumstances it can be changed, but only after agreement with FMJD-TD.
5. During the ceremony's players must be dressed accordingly.
6. Opening ceremony should not be longer than $45^{\prime}$. If the ceremony is longer, players need minimum 2 hours break before their first game.
7. For the last 3 rounds it is strictly forbidden to start any game against the schedule. Only in the special cases connected with accidents, medical reasons etc. this can be changed. The purchased ticket cannot be the reason!
8. Closing ceremony:
a. should not be longer than 1 hour.
b. The organizer must prepare a diploma for each player and a diploma should be given to each player from the bottom of the classification.
c. Top three should be presented in front of the public. The winner in the middle, the second player on his right and the third on the left. With the three presented, the National anthem of the winner should be played. All this separately for men and women (if both categories played).
9. The player who will not attend the closing ceremony:
a. Loses any rights to the financial prizes.
b. In World Cup events - his/her score for World Cup from this tournament will be reduced to zero.
10. The podium
a. The podium must be correctly shown. Close to the podium must be prepared a free place for the officials.
All this area must be separated from the audience.

This is necessary to honor top 3 players and make possible to get good promotional materials from the event.
b. Example of correctly organized podium

c. Position on the podium (second to the winner's right hand) :

Correct

d. The chief referee (or ceremony leader) call top 3 starting from third, then second and the winner.
e. Officials, sponsors,... gives medals, diplomas etc.. Depend on organizer decision one by one or when all 3 are on the podium.
f. All 3 on the podium with official award - then official goes to their position which should be a little bit distance from the podium. All area should be isolated from the public.
g. The winner's anthem is played. This is time for the picture of top 3 players.
h. After anthem performance officials are invited to stay at the podium area. This is time for pictures of top-3 athletes with officials, sponsors etc.
i. The ceremony leader thanks everyone and continue his schedule

## Updates

## Updates in FMJD Annexes (bugs fixed in April 2024)

1. Annex 18 - deleted texts concerning events before 2021
2. Annex 10 - corrected values below table X-3

## Updates in FMJD Annexes after e-voting March 2024

1. Annex 12 point 2 - Number of participants increased to 20 from 16.

## Updates in FMJD Annexes after e-voting February 2024

(numbers at the specification below are the same as in voting document)
2. Annex 9 point 6.3 - and Annex 17, changed text "(for the players with a rating above 2351 additionally minimum 30 played in the last 3 years)".
3. Annex 10 Reduced ratings counted gm/mi norms in articles: 2.1.1, 4.5.3, 4.5.4., 4.5.9., 4.5.10., 9.
4. Annex 12 - World Championship Women with 20 players (adopted after additional e-voting in March 24).
5. Annex 10 - point 3.2. and 3.3 deleted. Added to point 3.1: World Championship Women, European Championship Women and African Championship. Deleted sentence "with 20 players minimum"
6. Annex 10 point 5 - number of required games changed from 40 to 27 .
7. Annex 1 article 6.3 - some changes in the text:
(...) If the player with a king solely occupies the large diagonal for both players may play another 5 moves maximum. After these 16 the maximum amount of moves (...)
8. Annex 1 article 6.4 - added text:

After these 5 moves the game shall be considered a draw with exception for the following situation: with the last move of these 5 moves the position on the board is changed into a position which is lost for the opponent according to article 7.2.2 or 7.2.3: he cannot move because all his pieces are blocked or because he has no more pieces; in that case this will take precedence and the game will be declared lost for the opponent.
9. Annex 3 article 2.4.3 without reference to article 7.8 and article 7.8 deleted.
10. Annex 3 article 4.1 - added text: "The preparation period does not apply to blitz and rapid games.".
11. Annex 3 article 4.4 text "in case the black player is absent, his clock will be put into motion." Has been deleted.

Article 4.5 text "in case the black player is still absent, his clock will be put into motion; at his arrival, the referee puts the white clock into motion" has been deleted.
12. Annex 3 article 7.2-7.7

Article 7.2 - added text "The maximum time for an interruption is 1 hour"
Article 7.3 - text "If this is not the case, an availability of six hours per round is minimal." Has been deleted.

Articles 7.4., 7.5, 7.6 and 7.7 has been removed.
13. Annex 10 article 3.5 - text "before the start of the tournament" has been added.
14. Annex 12 article 10 \& Annex 17 article 11. Both about tile matches with new text.
15. Annex 2 article 3 f - definition of "young stars" age has been added.
16. Annex 3 article 3.1.6. - the height of the table has been defined
17. Annex 3 article 6.9 - text "If the clock emits sounds, it is considered an abnormality." has been added.
18. Annex 18 - International Cup has been deleted.
19. Annex 18 article 13 - changes in competitions fee.
20. (proposition \#19 voted has not been accepted).
21. Annex 18 article 19 - text "must be delivered to FMJD no later than 4 months prior to the event for the final approval" has been added.
22. Annex 18 - Prize money. Textual changes.

## Updates in FMJD Annexes after General Assembly 2023

1. Annex 12 and Annex 17, replacement of exact year to more general formulation like: "for two successive years before the year of World Championship" etc.
2. Annex 12 Appendix A. Option 24 has been added.
3. Annex 17 Appendix B. Option 48 has been added.

## Updates in FMJD Annexes March 2023

1. Textual corrections in the list of updates
2. Old text "Executive Board" missed before - changed to "Executive Council"
3. Annex 17 point 11. After e-voting, text proposed by Latvian DF has been added.
4. Correction of the year in Annex XVIII
5. Games rate corrected at the annex 17 (for classic games).

## Updates in FMJD Annexes after evoting October $2022{ }^{1}$

## Annex 13 The World Championship Youth

- Totally renewed Annex 13

## Corrections of bug fixes

1. (Feb $\left.1^{\text {st }}, 2020\right)$ Removed from Annex 10 point 4.4.1.1 "The tournament has at least nine rounds." All subpoints renumbered accordingly.
2. (Feb $\left.1^{\text {st }}, 2020\right)$ Summary of the document corrected.
3. (Feb $12^{\text {th }}, 2021$ ) Annex 17 - changes introduced by GA in 2015 are included. Points 8 a. point 11 added. Next points renumbered accordingly (previous point 9 has been deleted by GA).
4. (March $2^{\text {nd }}, 2021$ ) Annex 17, App. B1 p.2.4 Paring for round 4 corrected.
5. (September $\left.22^{\text {nd }}, 2022\right)$ Textual changes:
a. "Lehmann-Georgiev", "Superblitz (Lehmann-Georgiev)" changed to: "Superblitz"
b. "Executive Board" changed to "Executive Council"
c. "LG tiebreak" changed to "Superblitz"
d. "F.M.J.D." changed to "FMJD"
6. (September $22^{\text {nd }}, 2022$ ) Adaptation to existing and approved procedures:
