Proposition of FMJD-EB decision

Rome, April 13th, 2019

World Cup blitz

Motivation:

1. Most of World Cup tournaments usually has also blitz events.
2. World Cup in some countries gives chances for additional benefits for top players/federations.
3. For many countries it is very important to present number of countries participated in World Championships. If we define World Cup also as a part of World Championship – this will be very god solution.

The system:

1. World Cup blitz calculations – exactly like World Cup.
2. Starting point of calculation – May 1st, 2019 with first winners announced at the end of 2019.
3. Organisers are free to choose games rate: 3'+2" or 5'+3".
4. Every year FMJD gives medals to TOP-3 men/women and cups to the winners.
5. Relations to World Championship blitz:
    a. World Championship blitz should be always organised with round-robin final at the end.
    b. Top-3 (not best3!) from World Cup blitz previous year gets direct places in the final.
