DRAUGHTS FEDERATION OF TURKEY
TÜRKİYE DAMA FEDERASYONU
İzmir 64-100 International Draughts Association

To the attention of all country federations and their representatives,

Turkish Draughts is a well-known fact among the Eastern geography and Turks. Turkish Draughts includes a very wide geography and a long historical period. Most of this long process has been experienced in Turkey and the surrounding geography, and it is still trying to live. Due to the lack of an official corporate identity, it could not have the wealth of information and publications that would enable it to develop.

Turkish Draughts has been a part of FMJD in the past and has always been empty. However, in many countries, Turkish Draughts is played by large masses. It is usually within the body of associations and sports clubs and does not carry an official identity. With FMJD, it is necessary to make the masses interested in Turkish Draughts in Turkey an official identity.

There are many competitions and tournaments organized before the Covid-19 period, which affected the whole world. However, none of them are involved or registered with the FMJD organization. It is important for both Turkish Draughts and FMJD to record their rules, players and tournaments.

Turkish Draughts within FMJD needs active work and support in order to go beyond being a department with a name only. Since 2015, after my daughters got acquainted with this game, I have always been in the draughts with İbrahim ALİHAYDAR (ISMAYILOV) as the organizer, referee, player, trainer of many international competitions and the president of the Turkish Draughts Federation.

In order to contribute to the development of Turkish Draughts in the new term, I would like to be a candidate for the department head of FMJD Turkish Draughts, if deemed appropriate, and work for the development of FMJD.

Best regards

Turkey - İzmir, 23 Jun 2021

Volkan ÇETİN
President of Turkey Draughts Federation
